## DO YOU KNOW...

17 years ago, we were the world's first games magazine? Do you know that now, we're the UK's best-seller for magazines that cover every kind of game?

That's not us hitting you with hype or blasting you with hot air. You don't survive unless you're offering a superb magazine, and you don't stay Number One if you're not a whole lot better than the other magazines on the shelves. Those are two judgements that readers like you make, every month...

YOU'RE holding a new-look copy of Computer and Video Games. We hope you like it.

We think it's easier to use, looks better, works better and is even more cracking value than it's ever been. Of course, it's up to you to judge if we're right.

**Here are a couple of things we promise about everything we've done to make Computer and Video Games even better.**

- We stick to the same high standards in testing and reviewing games we've been famous for, so you'll always know what we think or recommend before you make up your own mind about the games you play or buy.
- We want you to have fun and enjoy this magazine.
- And we get exactly the same buzz out of great games we've always had...

# V-RALLY

It's the game that never ends – over 20 cars, four-player mode and as many tracks as you want – all in one complete package

WORDS & SCREENSHOTS: STEVE KEY

**V-RALLY** proved to be a major hit. Even the cut-price version sold extremely well and with the sequel, another smash is definitely on the cards. This game has more of everything: double the amount of tracks, more cars, game modes and even the amount of players you can have has gone up. You can also build your own tracks with a really simple track editor. A more complete package we have yet to see.

# 2

INSTANT PLAYER GUIDE INSTANT PLAYER GUIDE INSTANT PLAYER GU

EASY RIGHT MAYBE

The key to mastering this game is learning the way a specific car handles and then practice solidly. However, everybody needs a few pointers, so here are a few key tips to get you started.

When racing in the snow, try and anticipate the sharper corners early and start your powerslide so once you've hit the bend, you're practically sideways and can accelerate straight down the track.

Instead of using brakes as you hit the bends, take your finger off the accelerate button for a split second and then reapply the throttle as you get into the corner.

Sliding into the scenery can help you in your race. By sliding into high banks on corners, the nudge will kill the powerslide and leave you with enough speed to accelerate away from the corner.

## TIME IS OF THE ESSENCE

There are four different racing modes you can play in *V-Rally 2*. Primarily you still need to come first, but that isn't always 100% necessary. Take a look at these to see exactly what we mean.

**TIME TRIAL** This is your chance to practice one particular circuit you may be having trouble on. Only the tracks you've uncovered can be raced on but you can have two or more players competing at once and a ghost car in the single player mode, if you wish

**V-RALLY TROPHY** The key to winning the Trophy is not where you finish but the amount of time it takes you, as your positions are calculated on time. The time is added after every race and after 12 courses you'll see the final standings. The most tense, this is our favourite

**ARCADE** You compete against three other computer controlled opponents and basically have to do your best to finish as high as you can. Points are awarded depending on how high you finish, and winning the group at the end opens a new class of driving

**CHAMPIONSHIP** This time it's only you on the track as you compete against imaginary drivers. Each country has two tracks and you can inflict damage to the cars. You must repair them at the end of the first stage. Points are awarded upon completing a country and being put into a league

## SECRET STUFF

The big incentive to play *V-Rally 2* until your eyes bleed lies within the vast amount of the game that is not selectable from the start. Only by winning various game modes can you unlock the tracks and the secret cars needed to get the full *V-Rally* experience.

The first secret car you get is the Ford Escort V-Rally. To be honest, it's a pretty pants car but the sleek black design mean that it looks nice. There are a total of ten cars to unlock as well as all of the new circuits

The three major game modes only have the easiest set of courses available to you at the start. When a level is won, a new set of stages opens up, but with increased difficulty and there's more of them. The final *V-Rally* trophy has 15 stages

As well as the serious cars, you also get a few comedy looking ones too. The classic car buffers out there can race a Renault 8 Gordini and a Fiat 131 Abarth. Although they are not a patch on the real rally cars, they are good for a bit of a laugh

## INSTANT PLAYER GUIDE

### BUMP DEM CARS

As well as mastering the cornering using your accelerator and brake buttons, there is a more sneaky way of taking hairpin bends at over 150mph. Intrigued? Read on to find out more

You can use the other cars as bumpers to send them crashing into lands and giving you the boost you need. You can plough straight into them and not damage you car unless you're playing the *V-Rally* trophy, but even then you can repair it.

If you're side by side with the computer controlled cars, keep applying the pressure and try to force them into the side of the track. They'll never push back, so you can cut them up forcing them to brake, or flip them over so they lose valuable seconds

If you approach any bend with one or more cars by your side, make sure that you're on the inside line. Then, if you do accidentally oversteer, the cars on the outside will cushion your car and send it back on track

## QUAD DAMAGE

The best new addition to the game is the four-player mode. Usually this kind of luxury could only be afforded by those who have link-up cables and two PlayStations, but thanks to the programmers, all you need is a multitap, four pads and enough mates to play with.

Rather than sacrifice visual impact the detail in the trackside is reduced, as is the number of polygons in the cars, so that it still runs just as quickly as before

If you have a big screen to play this on, then you'll find it much easier to use as you have a big quarter of the screen. Those with smaller TVs may have to resort to the farthest camera view

Any of the tracks in the game can be raced in the multiplayer mode. If you only play with two human players the computer will make up the other two drivers for you

## WHAT WE THOUGHT

### FIRST IMPRESSIONS

It's hard not to be impressed by *V-Rally 2*. Everything that was wrong with the original has been improved upon and the result is a brilliantly entertaining package. The sheer number of tracks and cars to unlock means you'll be playing for weeks to come.

### TUCK AND ROLL

The handling and ease in which the cars roll were two of the biggest complaints from the original. They are improved, but there is the odd section where you'll shout at the screen as you lose it on the last bend.

### NOT ALL IT SEEMS

The track editor is a brilliant option and is so easy to use, it's just a shame you can't race it in any other modes other than time

trial. Four-player mode is very good too and compliments the single player game superbly.

### THE VERDICT IS...

It's a very slick, well presented and a downright superb game to play. Trying to compare it to *Colin McRae Rally* would be silly, as this is more of an arcade style rally game. With regard to enjoyment, this game won't be beaten.

## TRACK EDITOR

Building tracks to race on is the long term test for this game. Seeing who can come up with the toughest track then shaving seconds from the course record is your goal. Here are some top tips on building tracks.

There are two types of circuit you can make: a looped or straight track. If you go for the looped, make sure the two ends of the track are near when you join them with the looping tool and you have a couple of blocks left, otherwise it's back to the drawing board

Making elevations is crucial if you want to add some pace or punishment to your circuit. Making lots of small left and right turns on a downhill section will let you pick up serious speed, so throw in a hairpin turn at the end and watch them all stack it

Simple things like changing the weather and location of the track can seriously change the difficulty. Any night stages will be difficult, especially if they are on narrow circuits. Alternatively, rain or snow in Finland makes the tracks very icy

# IS THIS THE MOST

TRAC

There's not much that will slow Alister down. Will it be the same for you on our specially designed track?

## ALISTER McRAE HE KNOWS A BIT OR TWO ABOUT RALLYING

At 28-years old, Alister is proving to be more than a match for the other famous McRae drivers. His father is the five time British Champion Jimmy McRae and his brother is the

1995 World Champion, Colin McRae. In 1992 Alister won the Group N British Rally Championship and then went on to win the series outright in 1995 in a Formula 2 Nissan. Then it got even better. In 1997 Alister joined the Volkswagen Formula 2 team for two years in which time he recorded a total of six F2 victories. He finished the 1998 season partnering his brother Colin in the Great British Rally. For the current season Alister is partnering Kenneth Eriksson in ten events for Hyundai Motor Sport Challenge as they compete for the FIA Formula 2 World Championship, which is where we caught up with him and got his help with our special stage.

# EVIL TRACK EVER?

Formula 2 rally driver, to create the most difficult, evil and hellish circuit we possibly could

LOOPED

## ALISTER'S VERDICT

**1** "It looks like a really good stage. It's difficult with lots of tight corners that lead into one another and there's a bit of everything in it. It's definitely a driver's stage - and would certainly keep you busy."

**2** "There are a couple of places that look a bit tricky - the downhill tight hairpins, like the second turn (tight hairpin left) and the one after the straight and the fast right (open square right into long 180 left tightens) look like they'll need careful attention. You'd have to make sure you get your braking right for those, otherwise you'll wreck your times. And your tyres."

**3** "The right/left kink in the straight portion also looks like fun - it appears that, if you get it right, it's almost flat out. Almost."

## ALISTER'S DRIVING TIPS

**4** "The most important thing when driving on ice is to try to keep the car straight. Too much sideways and you'll not only lose time and speed but you'll knock the studs out of the tyres (rally cars use studded tyres for extra grip on ice) and then you'll have no traction and the car will be very difficult to drive. For the same reason, you must not be too aggressive, either with your braking or acceleration, or you'll lose grip."

**5** "Driving on snow at night can be quite good fun, especially if there are high-ish snow banks, which tend to make the road easier to pick out and have the added advantage of keeping the car on the road if you run a little wide. But if there aren't any snow banks, just the road running up to trees, it can be a bit tricky figuring out where the road goes. My advice to readers is to strap yourself in tightly and don't fall out of that armchair!"

## WANT TO HAVE A GO?

Then why don't you try it out for yourselves. If you send us in a S.A.E with your memory card, we'll save our *V-Rally 2* track so you can try it out for yourself. If you beat our time, then send in some proof (preferably a photograph of your time) and we'll print the best. Who knows, maybe we'll even give the best time a prize. PLEASE INCLUDE THE S.A.E. OK? # DREAMCAST: MORE POPULAR THAN

Hundreds of players flood to HMV to play Sega's new console

Everyone took the Challenge so seriously. We had to step in now and again to stop the fights

The Computer and Video Games Millennium Challenge drew in more people at London's Oxford Street HMV store than when Kelly Brook last made a public appearance there. Why? The chance to play Dreamcast before it goes on sale, plus the chance of winning Sega's new console, £500 and a year's supply of Dreamcast games. "I've been working here for eight years and I've never seen anything like this," said amazed HMV Level One manager Stuart Mullen. "I mean look at it!"

Sure enough, Level One was packed. When we arrived to speak to Computer and Video Games readers it was jammed with people waiting for a chance to play Dreamcast. "There's more people here than came to see Kelly Brook," said Mullen. No wonder security looked nervous.

### LET ME AT IT

Even before the challenge officially started, HMV staff had signed up 80 people keen to play both *Sega Rally 2* and *Metropolis Street Racer*. A

group of up-for-it-lads had even scaled the escalator at 9:15 to be the first in the queue.

For reasons beyond our control, *Metropolis Street Racer* is suffering production difficulties and means that the Challenge game will be *Sega Rally 2*. As it turned out, players didn't seem too bothered.

"I thought it was going to be *Metropolis* here today, so I'm a bit disappointed but *Rally* is great. I'm going to buy a Dreamcast," said Rahman. Joe Rowan had only seen Dreamcast in Computer and Video Games until the Challenge. "It's better than I expected," he said.

### ON THE NET

People had different reasons for going to the Millennium Challenge. "Well, my brother wants to get a Dreamcast," confided Tsitsi Dodzo

who was obviously trying to win it for herself instead. Thomas White, who already owns an imported Japanese machine, said, "I want a UK machine for the internet."

The winner of the first Millennium Challenge, Ricky Ip Wai-Hung, wanted a Dreamcast for his cousin. He already owns a Japanese Dreamcast. In fact, Ricky has managed to get his Dreamcast hooked to Sega's Japanese web service. An expensive kind of hobby.

### DID YOU LIKE IT?

The fast guys took the spotlight but everyone who showed up walked away with a cool prize – the first new-look issue of Computer and Video Games and a Sega video of exclusive Dreamcast footage, including the awesome *Shen Mue*. The vibe was very pro-Dreamcast. One of the coolest guys at the event, still hot for Sega, was Razaz Ahmed. He told us, "I don't own a PlayStation. I have a Mega Drive and Saturn. If Sega puts Dreamcast everywhere – billboards, TV and cinema, it will definitely sell." What, no PlayStation? Even now? "No. I mean Sega is the one."

Ricky and Kamal compete for a place in the final. Little did Ricky know

**WILL YOU BUY DREAMCAST?**

Everyone we talked to about Dreamcast answered "definitely" when asked if it's something they'd buy. The internet aspect is less of a big deal than we expected to find, though. Long-time gamer, Thomas White, told us, "I want a Dreamcast for the games. I'm not really bothered about the internet." Joe Rowan, thinks, "The internet idea is good but that's not why I'm buying one."

**COME JUDGEMENT DAY**

It looks like Sega has got a success story on its hands, Dreamcast proved its worth at the Millennium Challenge for sure. But it's a while until 23rd September, which will be your first opportunity to own a machine. Between times make sure you get to the Computer and Video Games Millennium Challenge at an HMV near you. Remember you stand a chance of winning a Dreamcast, a year's supply of Dreamcast games and £500.

**ELSEWHERE**

In addition to the London event, we'd also like to mention the winners of our Challenges elsewhere last month. So congratulations Rudi Halfmann from Markfield at the Leicester event. Also Chris Lam in Birmingham. We hear you both played amazingly on *Sega Rally 2*. We can't wait to see how you drive in the final.

Is that a smile? It's almost a smile. Better luck next time, Kamal

**IAN KELLY BROOK**

Tsitsi Dodzo was on a mission to win a Dreamcast for her brother

Smug grins can only be worn by winners. Ricky wears his well

Sticking your tongue out ain't gonna scare him away y'know

## WHAT'S IMPORTANT

The Computer and Video Games 5-star award is your guarantee of a great game. When you see the logo, it's like having an informed best mate recommend you a game personally. It's something you can always trust.

**HONEST** Regardless of hype, reputation or advertising surrounding a game, if it's great we'll say so and if it's poor, we'll tell you the truth.

**FAIR** We're not biased. A good game is a good game regardless of format or who's made it.

**THOROUGH** We play games longer and harder than anyone else. And we don't rate games on half-finished versions either. We'd rather wait and give you the full, accurate story.

**KNOWLEDGE** Computer and Video Games is 17 years old. We were the world's first games mag which means we've played more games than another other mag. Our writers are all experts, have years of experience and know what makes a cracking game.

Any game that earns the 5-star award is truly exceptional. It'll do more than just look good and play well, it will rank with the most enjoyable and rewarding games in existence.

**WARNING:** This game contains scenes of extreme violence and gratuitous swearing. Excellent!

**L**ife is tough in the ghetto and when you take a beating to teach you a lesson, there is only one thing you can do to save your reputation – take revenge, by whatever means necessary. That's the object of

*Kingpin*. The further you delve into the seedy world of dodgy deals, musclebound bodyguards and general nasty characters, you soon realise that your revenge mission is going to have to go all the way to the top, with no looking back.

Yes this game is violent. Yes it's got lots of swearing. And yes, it will get parents steaming if their little soldier-boy comes home with it.

But the simple fact of the matter is, *Kingpin* is the total and absolute nuts. Oh yes.

## GUNS FOR SHOW

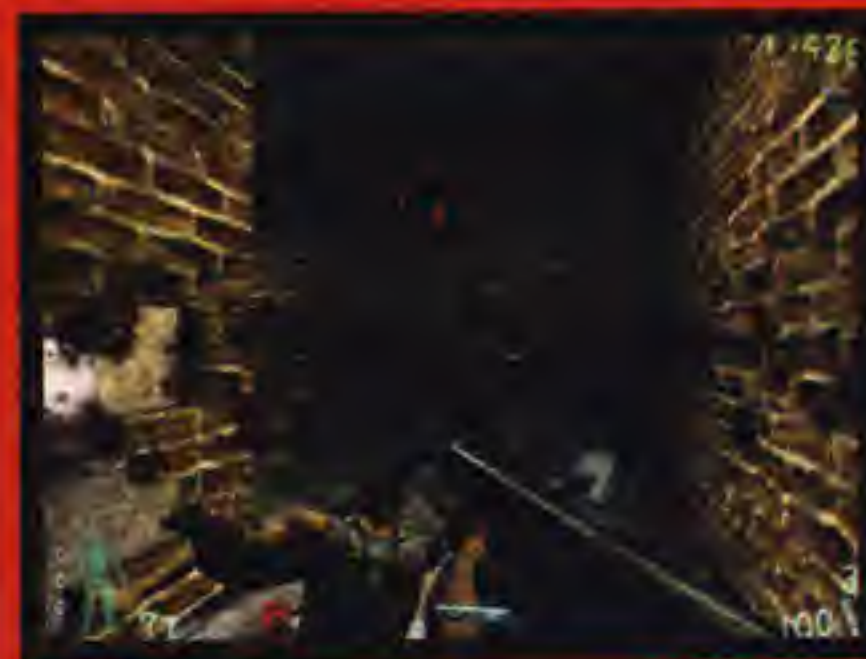

Seeing as you start the game with no money and only one weapon, it shouldn't take you long to work out that the only way you're going to get more loot and ammo is to use brute force. Batter a few people and crack some skulls. Then you'll get what you need, a pocket-full of dollars.

You start with only the Pipe as a weapon. It's the poorest of the lot but still gives off a nasty thud when you batter someone over the head with it. Once you've got some cash you can upgrade to a crowbar for one buck

The Pistol you get at the local gun shop, called Pawn-D-Matic. Don't buy one, as once you've sneaked into the first warehouse (as the guards are distracted by the radio), you'll find a coil which the gun shop owner will trade for a pistol

Thankfully, you don't have to worry about buying this weapon either. The Shotgun is dropped by the local heavies once you gain access to the rooftops, so make sure you keep an eye out for it on the floor amongst the dead bodies

The fourth weapon you grab is also dropped by dead enemies in the power plant, and that's the Tommy Gun. It's got an immense rate of fire, you can unload 50 bullets in a couple of seconds which will tear enemy bodies to shreds

## INSTANT PLAYER GUIDE

### DOUBLE TAKE

Items in the background may hold more clues than you imagine. It's worth whacking a few things with your crowbar to see if it smashes to reveal some new secret passage or an item.

In the warehouses particularly, the single crates you find on the floor can be pushed to better locations. These are basically steps you can use to give you the added height you need to reach ledges and ventilation shafts

The ventilation shafts can sometimes be covered by crates which can be blown away or pushed to one side. Shoot the grille and crouch to crawl into them and secret sections. Look out for rats though, as they nibble you and drain your energy

Other scenery options may not be as apparent. Once you're in Poisonville, jump onto the rooftops and crawl along the pipes. This will lead you to another section of the city, some lovely health and ammo houses and the way forward

## MUSCLE FOR HIRE

Trying to exact your revenge on your own would be foolish and impossible. Which is why the local burns with nothing better to do will follow you for the right amount of money. Choose wisely as they're not all good guys

Once you've bought a guy he'll follow you around, or otherwise, if you give him the orders. Hit trouble and he'll be there with his shooters out making sure that his boss doesn't chew some lead

If your boys get injured, they'll gain health back automatically. Some hoods have specific tasks, like a safecracker, so it's best if you find the safe before you hire him to save you cash if he dies on route

Once you're under fire, your hoods will fight to the death. If they come into your line of fire, as soon as they take a bullet from you the allegiance is forgotten and they'll run at you, all guns blazing

## NOT JUST KILL KILL KILL

To spread word of your reputation, you have to help some of the bigger characters. This can earn you money, clues, keys to new parts of the game, or some new heavies to pick from.

The guy who sells you the crowbar at the start of the game runs into some trouble later on. He has his watch stolen by one of his enemies and asks you to get it for him. Do that and he'll give you access to the rooftops

At the bar in Poisonville, there's a guy standing on the mezzanine who wants some documents stolen from a safe in the power plant. He'll give you the choice of all his guys if you help him – you'll need a safecracker

## WHAT WE THOUGHT

### FIRST IMPRESSIONS

Games that stir up controversy to get publicity are generally crap. However, take away the violence and swearing from *Kingpin* and you've still got an awesome game.

### SUITS YOU SIR

The adult content doesn't sound fake or forced. It matches the environment and atmosphere. After all, you wouldn't walk up to somebody with a shotgun and tell them to "Walk away sir, or I will be forced to draw my weapon too." This is *Menace to Society*, *Boyz in the Hood* or *Goodfellas* on a disc.

### I'M THE DADDY NOW

The game starts at a hundred miles per hour and holds that pace. Guys you thought were friendly will be whipping out shotguns before you can say

"Hasta la vista". It looks amazing and the crowd who gathered to watch us play left thinking it was very impressive indeed – but not just because of the content.

### THE VERDICT IS...

Ignore the palaver surrounding *Kingpin* and get yourself a copy. It plays like a dream and will have you whooping with joy after every level is successfully completed.

## INSTANT PLAYER GUIDE

### HAVE A NUTTER

Chatting to people is not only funny, as that's when they're most likely to swear at you, but can also reveal some interesting snippets of information. Use the Y button for friendly replies and X for negative ones to get a conversation started.

The first bum who doesn't try to kill you is in fact a down-and-out alcoholic who spills the beans once you've found some booze to give him. He'll also give you the keycodes to the safe and a bag of cash

You can tell who's going to be helpful by the colour of the face at the bottom of the screen. If it's blue, they may have some info for you. If it's red, they're more than likely going to deck you

### OTHER HINTS

There are a couple of key items that you may miss the first time you visit an area. To save you from continuously going backwards and forwards between levels, here are a couple of things you should remember.

To escape from Poisonville, you need to find the battery to power the motorbike. The first boss holds it, so once he's defeated make sure you climb the wrecks of cars in his yard to find it

People won't give you any grief if you don't give them any. Walk up to calm people with your gun out and they'll draw a weapon. Don't kill people without weapons, they have information you need

**Premier Manager 64** is the only game so far to feature the *Actua Soccer 3* game engine

Barry Davies still provides the commentary, although it is a little limited in this version

# PREMIER MANAGER 64

It's the first ever football management simulation for the Nintendo 64

## WHAT YOU NEED TO KNOW

Having already had huge hits on PlayStation and PC, this is the newest addition and it comes rather surprisingly on the Nintendo 64. It's also probably the easiest of them all to get into, as the limitations of the cartridge system, and the often younger Nintendo audience, mean it's been designed a bit like the beginners' guide to *Premier Manager*.

## BACK TO THE DRAWING BOARD

There are two types of game mode you can choose from: the manager mode which lets you pick your favourite team and manage them; or the career mode where you have the choice of ten lower league vacancies. Here you have to prove yourself to be a worthy manager

WORDS/SCREENSHOTS: STEVE KEY

before you get offered the top jobs and can progress up the leagues. The game has been designed specifically so that all of the menus can be flicked through very quickly, so it works very well on the Nintendo pad.

## WORTH PLAYING?

If you've never played a football management game before, then yes it is. This will serve as a good introduction to this type of game, so if you like what you've seen here you can branch out into the more detailed management sims already available. However, all the Sir Alex wannabes who've blitzed *Champ Man* will find no satisfaction in this game. So it's all down to your experience, really and what you want from a management game.

To skip the matches, select the highlights and press B to finish the game instantly

You can only select teams from the same or lower divisions for friendlies

Most of the standard formations can be selected from here

# FA MANAGER

Sheepskin jackets at the ready – it's time for some football management

WORDS/SCREENSHOTS: STEVE KEY

## WHAT YOU NEED TO KNOW

It's the official licence of the FA so you get all of the teams from the four leagues and the conference. You pick any one of these teams and try to take them to the top (if they aren't already there). Wheel and deal to strengthen the team and use your tactical know-how to out-wit the opposition.

## JUST FOR PLAYSTATION

It's been programmed just for PlayStation, so the control system is incredibly simple. That can also be a hindrance because you get so used to tapping X to skip all of the nonsense games in the other divisions, you might end up selling your best striker by accident.

## WORTH PLAYING

Yes and no. Once you get into it and your team has started to gel

The action takes place in the small screen at the top of this screenshot. It also has text messages that flash along the bottom which accompany Brian Moore's commentary

All English leagues are catered for in this game

Scouting big name players is easy

together it's good fun. Scouting the transfer market, haggling with clubs, or bringing one of your youth team players through the ranks is satisfying. It can be a little frustrating so we'd say you should only go for this if you're sick of *Premier Manager*. That's the best PlayStation management game.

# STAR WARS EPISODE I THE PHANTOM MENACE

WORDS & SCREENSHOTS: ED LOMAS

It's official – things to do with Star Wars aren't always brilliant

**T**here have been loads of Star Wars games over the last 20 years, all of which have sold well, partly because of their Star Wars connections and partly because they've been consistently good. This is the game of the latest movie in the series – Episode I: The Phantom Menace – and has been in development for years, since before the movie started shooting, in fact. But don't get too excited, it looks like fans are in for a big disappointment.

## YOU WANT TO BE A JEDI

You get to play four characters throughout your adventure – Obi-Wan Kenobi, Qui-Gon Jinn, Captain Panaka and Queen Amidala. Everyone can use the weapons found lying around, plus the two Jedi masters use their Lightsabers and the ancient power of the Force.

The coolest weapon ever created is a real let-down in *The Phantom Menace*. Hold the attack button to wave it around and hopefully deflect some laser blasts from you

As a Jedi you can use the ancient power of the Force to make enemies fall on their butts for a second or two. No wonder all the Jedi Knights get wiped out

It's not really the Jedi way for Obi-Wan Kenobi to take on a Battle Tank with a Proton Missile Launcher, now is it?

## FOLLOW THE PLOT

*Star Wars Episode I: The Phantom Menace* follows the plot of the movie quite closely, so anyone who's not yet seen the movie should do their best to avoid the game until they have. Or do yourself a big favour by avoiding the game altogether.

At the start of the game, Obi-Wan and Qui-Gon must escape from a Trade Federation ship by smuggling themselves as part of the invasion force

Once on the surface of Naboo, Obi-Wan must meet up with Qui-Gon. Thankfully, pain-in-the-ass Gungan Jar Jar Binks knows his way around the swamp

As Trade Federation droids invade the Gardens of Theed, you must take Queen Amidala to the safety of her ship, then get the hell out of there

## GOOD TO TALK

To add an adventure feel to the game, you occasionally get the chance to talk to other characters. A selection of phrases appears on-screen for you to choose from, though no matter what you do, you will almost always get the same piece of information.

Occasionally choices will appear in pink, meaning that your Jedi character will use the Force to influence the person they're speaking to

Why does Obi-Wan stop to chat to this stupid gibbon when he's on an important mission to save the galaxy? If only you could chop his head off

There's a little bit of interaction with the Queen's guards as they defend the palace, but not enough to make you believe they're in any way human

# "A nightmare from start to finish"

Some flying sections would have been nice to break up the action a little. Some gameplay would have been a bonus, too

## WHAT WE THOUGHT

### IT'S STAR WARS!

Normally, a weak game can be worth playing simply because it's Star Wars-related. Amazingly, *Episode I: The Phantom Menace* is so bad, even the biggest movie license in the history of games can't save it from being appalling. The title screen has some excellent video clips from the film, and the sound is great, but otherwise this just destroys the good name of Star Wars.

### SMART SOUNDS

The best thing about *The Phantom Menace* is the sound – the top-quality score reacts to the action on-screen (to an extent), and the sound effects are spot-on. Character voices have been recorded by impersonators. They are OK – though Obi-Wan does sound a bit like Austin Powers at times. Everything looks pretty good, if a little plain.

### BUT HOW DOES IT PLAY?

Oh dear. Controlling your

character is a chore, as they trundle around everywhere and get hit by almost every shot fired at them – even the two Jedi masters are incapable of moving like human beings. Level design is poor, with loads of dull button-pushing, stupid traps, nonsensical puzzles, dumb enemies and annoying conversations. Aside from a few interesting sections, this is a nightmare from start to finish. Spending time having my love for Star Wars beaten out of me was not my idea of fun – save yours by avoiding this game completely.

OK, so there have been loads, but if you've ever learned how to play any of them you'll know how excellent they can be. I've been a fan of the *Alpha* series right from the start.

### WHY SHOULD I BOTHER WITH THIS ONE?

It's got all the best elements of previous *Street Fighters* in one game – loads of classic characters are back, plus there are three different styles for each.

### BUT IT'S NOT IN 3D!

No, but it still looks fantastic. The artwork and animation are brilliant, and being 2D, you concentrate on fighting rather than moving in and out of the screen.

### WILL I GET BORED QUICKLY?

No way! The characters are all so detailed you can spend years mastering each one.

# DUNGEON KEEPER 2

WORDS & SCREENSHOTS: ED LOMAS

Design the most evil dungeon ever and attract a horde of freakish demons to do all your dirty work

"Where's the High Scores section gone?"

**T**o most people, strategy games look like they require far too much effort to be worth playing. Most of the time, they'd be right. But the very best strategy games are those which can be learned in a matter of minutes and still have years' of potential – a few can be awe-inspiring in their seemingly limitless depth. *Dungeon Keeper* was one of these very special games, and the amazing follow-up improves in just about every area.

## THE BIG IDEA

The idea of *Dungeon Keeper 2* is to dig out and build a cool underground dungeon – one so cool that every kind of creature in the underworld wants to come and live in it. You then need to keep your family of monsters happy and use them in battles against other Keepers and pesky invading Heroes. It's a lot easier than it sounds, too.

You start each dungeon with just a few little imps working for you. These guys will dig out any areas you mark with this digging tool

This is your precious Dungeon Heart. Make sure you protect it well, because if it gets destroyed it's Game Over for you

In one-player games, Heroes occasionally tunnel their way into your dungeon and steal your gold. Defend your rooms and corridors well

## CHANGING ROOMS

Once your imps have dug out a room and levelled the floor for you, simply choose what function you want it to have. You'll need to build lairs for your creatures to sleep in, a treasury to store gold, a library for Warlocks to do research in, training rooms, casinos, and hatcheries to provide fresh chickens whenever anyone gets peckish.

Torture chambers are great. Not only do they attract kinky Mistresses, but you can torture information out of opponents

The Combat Pit allows your creatures to fight one another to improve their ratings quickly. Make sure they don't kill each other

Your dungeon layout is important – creatures don't want to walk miles to eat and some species don't get on very well with others

## CREATURE FEATURES

There are a number of species of monster to attract to your dungeon, each with their own special abilities and personalities. You'll soon figure out what kind of dungeon attracts what creatures, and will be able to build up your ideal collection straight away. Everyone will find their own playing style after only a few games.

Bile Demons are lazy and love a dark lair right next to a hatchery

Dark Angels are extremely cool. A temple will help attract them

Warlocks work hard in your library, researching new spells

## DON'T FEAR THE KEEPER

As the Dungeon Keeper, you control a floating hand which you use to mark out areas and select creatures (or give them a quick slap if they're not working hard enough). As you spend time researching and building your power up, you earn more powerful spells which you can cast from your clawed fingers.

The simple Thunderbolt spell will always raise a laugh. If an enemy creature strays onto your land, just fry him with a blast of lightning

Possession is certainly the coolest spell. You can use this to take control of any creature from a *Duke*-style viewpoint.

If you've got the power, you'll get to Summon Horny – the terrifying Horned Reaper. He wanders around killing everything

## WHAT WE THOUGHT

### SO SIMPLE, YET SO COMPLEX

*Dungeon Keeper 2* is easy to play. You use a mouse pointer and the arrow keys to do almost everything. All the menus are easy to understand, so anyone can learn to play without any trouble. A brilliant tutorial teaches you everything

you'll need to know on the way.

### IMPRESSIVE GRAPHICS

The 3D graphics in *Dungeon Keeper 2* enhance the atmosphere, with subtle lighting and detailed animation – possessing a creature and wandering around your beloved dungeon is great fun. The sound effects and grumbling ambient music really help a lot too.

### A HIT ALL ROUND

Trying to work out how *Dungeon Keeper 2* was put together will make your head hurt, it's such an achievement. The one-player modes are great, and multiplayer mode is one of the best ever on PC – this game will last a very long time indeed. If you only buy one game this year, *Dungeon Keeper 2* should be it.

# HIDDEN & DANGEROUS

World War II, control the SAS on covert missions and kick Jerry's ass

WORDS & SCREENSHOTS: ALEX HUHTALA

## WHAT YOU NEED TO KNOW

War. What is it good for? Absolutely nothing. Except for games like *Hidden and Dangerous*. You control an elite troop of hand-picked individuals who carry out daring missions for the allied forces in World War II, and if you think it sounds just like the surprise hit of last summer – *Commandos* – you'd be absolutely right. Except *Hidden and Dangerous* has a trick up its sleeve – this game's in 3D.

## IT'S A BIT DIFFICULT

Controlling a squad of four men against unfair odds isn't. You're not supposed to sprint into the middle

of an enemy base, all guns blazing, instead you need to carefully plan your attack and strike at the enemy, while being safely concealed. Thanks to maps and controls, you can plan your strategy with ease, deploying your men in perfect positions. Clicking on hand signals tells the men to guard, attack, lie, stand and wait for your signal.

## LIKE CLOCKWORK

Most of the enemies in this game are accurate shots, they usually spot you before you've located them and one shot to the head will kill you. Ouch! You pick your team from a choice of 40 men, each with

different abilities. Picking someone who's good with a sniper rifle is a good way to get through the first few levels, but the game has over 20 missions. You're not restricted to shooting, setting explosives and freeing prisoners, you'll also be asked to steal maps and vehicles which, best of all, you can drive.

## WORTH PLAYING?

If you fancy yourself as the John Wayne type, this is the game for you. It's very difficult, you'll die a hundred times and each level throws a new surprise at you. The graphics are gorgeous and the levels are very well designed but best of all, and even better than *Commandos*, you get a real sense of being in the middle of the action, with controls that allow you to run everything smoothly.

Drive vehicles and avoid German machine-gun fire. How much fun is that?

Storm the enemy base and provide cover for your men. It's usually a good, safer plan to have your men in different positions, but this looks cool

If one of your men is carrying a camera, then you can take snaps like this while you're storming enemy base. It helps to make sure you've shot all the guards first though

**WHAT YOU NEED TO KNOW**

The long running *NBA Jam* series hits the Game Boy Color, losing none of the comically unfeasible slam dunks that made its predecessors smash hits.

**NO COMMENT**

Sadly the commentary of previous incarnations has been lost and replaced with some tragic in-game music. Sonic imperfections aside, a pretty good attempt has been made of squeezing lots of big men onto a small screen, with all 29 NBA teams represented.

**WORTH PLAYING?**

*NBA Jam* plays fluidly, and the gravity-defying dunks are occasionally amusing. Hit three unanswered baskets and you're 'on fire' – still one of videogaming's most satisfying experiences. Unfortunately a general lack of innovation sours the overall experience.

WORDS &amp; SCREENSHOTS: ALEX HUHTALA

Take parts of *Tomb Raider*, *Goldeneye* and *Metal Gear Solid*, squash them all together and this is what you get

# FILTER

**T**he world's in peril and you're the square-jawed hero who's been hired to save us all. Gabe Logan's your name - it's good for a hero, not too many syllables and completely laughable in the real world. Your mission is to find and eliminate a madman who's planting deadly virus bombs about the place. So far, they've been restricted to remote villages in the Third World but now the bad guy is going for Bond-villain status by stepping up his campaign. It looks like Washington is the next target. Cock the hammer, it's time for action.

## HOLD YOUR FIRE

There are lots of weapons and items for Gabe to find and use on his travels. He'll also have to find ammunition, which for some of the more desirable weapons can be in short supply. Every soldier you shoot will drop ammunition and sometimes the gun they were using. There are plenty of hidden items for you to find, too.

There are lots of handguns and assault rifles in the game. Mostly you'll be using a handgun as there's plenty of ammo about

The sniper rifle is excellent for zooming in from a great distance, but it takes a while to find the guard and steady your aim

The taser weapon sends an electric shock to the enemy, the viewpoint also changes allowing you to see the smoking damage

There are times when only a head shot will do, it saves you ammunition, and it also looks really cool. It's a shame it's so easy to do

## MISSION IMPOSSIBLE

Hunting down international terrorists isn't easy, especially when they have henchmen all over the world. Before you get to the showdown with the big cheese you'll have to take on the small fry, to extract some clues from them. The missions offer a lot of variety and you'll need to have your eyes and ears open to get through them.

Follow the old man through the museum, but several guards will try and stop you. Take them out without alerting the others

Inside the museum and there's another showdown. You can hide behind objects for extra cover and keep moving to avoid being hit

Most of the time you'll be facing groups of goons. In later levels they start wearing flak jackets – head shots will deal with them

**“Surrounded by guards – spraying bullets across the upper body will have to do”**

## PEEK-A-BOO

A bar in the corner of the screen tells you if the enemy can see you. When the danger bar reaches its limit, soldiers will begin to open fire. A radar tells you their position and you can hide behind objects to protect you in a gunfight. Be careful though, guards get smarter in later levels and they'll soon start lobbing grenades if you hide for too long.

Enemies aren't your only concern. There are other ways to die in *Syphon Filter*, like being hit by a train. This was a close escape

Sometimes you've got to forget being clever and hiding behind objects, just go out all guns blazing – best check your ammo first

Enemies can appear anywhere, sometimes almost on top of you. Using the shoulder button to target them makes aiming easier

## ONE SHOT

Just like in the game *Goldeneye*, the enemy can be shot in different parts of the body; shots to the legs won't kill a man while one bullet to the head will. When you're surrounded by guards you probably won't have time for perfectly planned shots, so spraying bullets across the upper body will have to do.

Even with a small handgun you can get precise shots at distance. Move the target until you see the words 'head shot' – it's easy

Holding the right shoulder button locks the target onto an enemy, useful for when you want to move quickly through an open space

Like the best action movies there are plenty of other objects that get destroyed in a gun fight. Glass is often the first to go

## LOOK FAMILIAR

Imitation may be the most sincere form of flattery, but *Syphon Filter* might sometimes go a bit too far for some people's liking. Although *Metal Gear Solid* was in development at the same time, the similarities between the two are surely too many to be pure coincidence. What do you think?

A sniper rifle just like in *Goldeneye*, it's not as quick and simple to use though

*Tomb Raider* with a bloke? Gabe likes climbing objects just as much as Lara

A snowy base that needs to be infiltrated. *Metal Gear Solid* – what's that?

There's even a helicopter battle on the rooftops. Call the lawyers, quick!

It may look like Gabe likes to hang around in toilets in this artwork, but we haven't found any urinals in the game! Probably in the sequel

**“When they wear flak jackets, head shots will deal with them”**

## WHAT WE THOUGHT

### UNORIGINAL?

Look at the screenshots, even play the game for ten minutes and you'd be mistaken for thinking that *Syphon Filter* is a direct copy of the games it seems to share so much in common with, but play a little longer and you'll discover that the blend works very well.

### SURPRISES

What the game does best is keep throwing new challenges at you. One level you might be required to go all guns blazing, the next sees you creeping around like Solid Snake. It's the variety and imagination shown in the levels that keeps you going.

### BUT A GOOD GAME

It may be unoriginal, easy in parts,

and have slightly glitchy graphics but when a game plays like this, we can overlook these details. If you bought *Metal Gear Solid* thinking it was the PlayStation equivalent of *Goldeneye*, then we're afraid you were wrong, *Syphon Filter* is the game you were really after. Try playing it, you'll like it.

**WHAT YOU NEED TO KNOW**

The *Need For Speed* games started off as some of the most realistic driving simulations around, but recent versions have been completely rubbish. Thankfully, they seem to be right back on track with this latest update, *Road Challenge*.

**LOVELY MOTORS**

There are loads of real-life high-powered cars to choose from in *Road Challenge*, though you'll need to earn prize money if you want to buy them in the full Career Mode. As well as racing around the world for cash, there are plenty of other options – Hot Pursuit mode is one of the best. You either play as a criminal on the run, or as one of the police themselves. These pursuits are a lot of fun.

**WORTH PLAYING?**

*Need For Speed: Road Challenge* is brilliantly presented and easy to get into, plus it has enough tracks and cars to keep you playing for a long time. The circuits all look great too, especially if you've got a good 3D graphics card. Car handling is a

nice balance between realism and fun, which racing fans will certainly appreciate. As a complete package, *Road Challenge* is one of the smartest racing games on PC.

Super-powered cars like this may look great, but they're useless for twisty bits

Racing from inside the car is great, but how do you turn the wheel?

In Hot Pursuit mode, the police set up roadblocks to cut you off. While driving, you can listen in on the police radio band to find out where they're waiting

# STAR WARS EPISODE I RACER

WORDS & SCREENSHOTS: ED LOMAS

The biggest buzz you'll get at the cinema this year can now be experienced on your PC

**WHAT YOU NEED TO KNOW**

You really need to be told? There's this film, right, and in it there's this race where aliens and some kid drive big engines with little chariots floating behind them. Well, that's what this game's based on. These racers travel at up to 600mph around twisty circuits on various planets in the Star Wars universe.

**WHAT'S THE DIFFERENCE?**

The PC version of *Episode I Racer* looks very smart indeed. With a good 3D card you can play in high resolution with loads of detail and a nice smooth frame rate. The sound effects are also higher quality than they are on the Nintendo 64 version, which helps

add to the atmosphere. Though you can play with a joystick or wheel, keyboard control works surprisingly well – it's nice to have a separate Boost button rather than having to tap Thrust as with the N64 game.

**WORTH PLAYING?**

Other than rendered sequences at the start of each race and enhanced graphics, the PC version of *Episode I Racer* is practically the same as the Nintendo 64 version. There's a good choice of racing games on PC already but anyone into Star Wars would be stupid to miss out on the chance to compete in a Podrace. For the sheer thrill of being part of the biggest movie of the year, *Star Wars: Episode I Racer* is essential.

Racing across Tatooine's desert in Anakin's Podracer is too cool

On the Sunken City race, keep an eye out for this Gungan Sub which flies past the underwater tunnels. Chances are Obi-Wan Kenobi, Qui-Gon Jinn and bleedin' Jar Jar Binks are on board

# 360

WORDS & SCREENSHOTS: ED LOMAS

Two years after *Wipeout 2097* and the most feeble rip-off yet is released

The designers of *360* obviously have no concept of what looks good. Or what a video game is

## WHAT YOU NEED TO KNOW

Set in the near future, *360* sees a battle for land after massive worldwide flooding. You compete in races on your high-speed hoverbike, doing whatever's necessary to survive. Like the *Wipeout* games, the ships float about a lot and can collect weapons to use on the way.

## WHOOPS!

*360* looks terrible. The racecourses and hoverbikes have no style whatsoever, and the textures are all so blocky that it's almost impossible to see what's going on as you play.

There are also only four different stages to race on, and even though there are three of each they provide little variety. Would you really want to be seen riding one of these things?

## WORTH PLAYING?

The hoverbikes have terrible physics which mean they glide all over the place at corners but still hardly lose speed if you pile straight into a wall. You never feel like you're really driving anything because of this, plus the scabby graphics and sound certainly don't help things. Seriously, you could make a more entertaining game from a brown paper bag and some pebbles in less than five minutes.

**WORTH PLAYING?**

The realistic approach means it takes longer to learn. In the long-term this means you get much more enjoyment from improving your skills.

**WHAT YOU NEED TO KNOW**

Realism can get in the way of enjoyment. In this case it's the fact that *Colin McRae* is so believable that it's such a thrill.

You get a massive buzz racing over loose surfaces and sliding through mud in a 'real' car.

# COMMAND AND CONQUER: RED ALERT

A spot-on conversion of the hit PC game, plus extra levels and better special effects

**WHAT YOU NEED TO KNOW**

*Red Alert* plays almost identically to original *Command and Conquer*. Build an army and become the field commander using a simple but versatile control system. The appeal is a new theme, an alternative World War II, which allows for new tools and tactics.

**THE SUPPORT BATTALION**

*Red Alert* is significant on PlayStation because it plays like the PC version. The original PlayStation *Command and Conquer* doesn't allow for players to go head to head. *Red Alert* does, via link-up cable with two PlayStations. You

don't have to struggle with poor control either, as *Red Alert* supports the PlayStation mouse which makes it far better.

**WORTH PLAYING?**

You'll make mistakes at first, wondering what all the fuss is about, but you'll love it when a plan comes together.

★★★★★

**WHAT YOU NEED TO KNOW**

When the original *Formula One* first released on PlayStation it raced well and looked great. There have been two updates since then, but neither one bettered *F1'97*.

**FINE BODYWORK**

The most striking feature about *F1'97* is the attention to detail. You get neat stuff like visor 'tear offs' that get dirty as you race, your brake discs glow orange with friction and you can see the white print on new sets of tyres as you leave the pits.

You get the option to race in Arcade or Grand Prix simulation mode. Most people want to take part in an F1 race without having to worry about stuff like tyre changes, damage to your car and spin outs the whole time in Arcade. Eventually you should get into Grand Prix for the ultimate F1 experience.

**WORTH PLAYING?**

Take our advice, this is the last great F1 game to be released on PlayStation. Buy it now.

# BRAVEHEART

WORDS: STEVE KEY SCREENSHOTS: EIDOS

## WHAT YOU NEED TO KNOW

The game is split up into two main areas of play. The 2D section is where you travel around Scotland from town to town, recruiting or setting up trade alliances to make your clan bigger. The second is the 3D real time fighting where you command your army and take out rival English armies.

## NEVER TAKE OUR FREEDOM

There are two goals in *Braveheart*. One is to be crowned ruler of Scotland, the other is to see the total destruction of the English armies. It's down to you to decide of you want to do this by brute force or using your political skill. Forming trade routes with friendly

clans can do more to boost your standing than taking over their town.

## AMIDST THE CHAOS

The fight sequences can have well over a hundred enemies on screen at once without slowdown. Troops can be told formations, set specific targets or work weapons like catapults. Before you start fighting you can also send in spies to towns to find out their strengths, weaknesses or items they trade.

## WORTH PLAYING?

Definitely. On the surface it looks like a boring game to play but actually it's totally the opposite. You can have multiple trade routes up and running as well as some of the most fearful enemies in your clan. It's an extremely well polished game which will have you entertained for weeks, providing you have the patience to get into it. Brilliant.

# BOSS RALLY

Driving fast cars along dusty tracks has never been so messy

## WHAT YOU NEED TO KNOW

*Boss Rally* is practically the same game as the Nintendo 64's *Top Gear Rally*, which was released last year. It's got a bunch of new features to go with its new name, including a big multiplayer mode.

## NOT TOP GEAR

Though the tracks and cars in *Boss Rally* are the same as those in *Top Gear Rally*, there are some thrilling extras for PC owners. Our favourite is the ability to taunt while driving – pressing F1 to F4 plays a pre-recorded insult such as "Loooooser!" or "It's the pedal on the RIGHT!" in a grating American accent. Combined with the whining engines, comedy beepy

You can race on each course in snow, rain or even at night. The icy tracks are very slippery

horn, and tragic crashing/skidding noises, *Boss Rally* has to be one of the worst-sounding games ever. Its 3D card-enhanced graphics are disgracefully bad too.

## WORTH PLAYING?

*Boss Rally* certainly isn't going to impress your friends – it looks and sounds appalling, and actually isn't a lot of fun to play. While it was made passable on Nintendo 64 with some extra options, it's a complete balls-up of a game when compared to the stacks of quality racers already available on PC.

WORDS & SCREENSHOTS: STEVE KEY

## TO THE SLAUGHTER

Surprisingly, there isn't as much as you'd expect to do in *Silent Hill* and there certainly aren't that many things to kill. You very rarely get more than two enemies at once. However, bullets are sparse so you need to know when to save ammo.

The giant bat things and mutant dogs are the most common enemies as they litter every street in the town of Silent Hill. When you hear a noise like a continuous bell ringing that's your radio emitting static, letting you know enemies are near

The bats take four hits to kill and the dogs take two. If the radio is still giving off signals when you've killed them, walk up to the corpse and hit X to either boot them in the head or stamp on their body to inflict the final death blow

As well as guns, you also pick up a variety of other hand-held items on the way. Everything from a small knife to steel pipe, to a full-on huge hammer can be used to smash up the various zombies and mutants you run into

# SILENT HILL

Prepare to enter the weird world of horror that's supposed to rival *Resident Evil*

It's being billed as the scariest game ever, which we can tell you straight away isn't true. There's only one big moment that'll make you really jump, compared to the five or six of *Resident Evil*, and the gore content doesn't

come close. One thing we can say about *Silent Hill* is it's pretty demented. What starts out as a holiday with your daughter to the town of Silent Hill, turns into a very twisted tale; it's difficult to know what's a dream and what's reality at times.

Working out who's the turncoat and who's going to provide the inevitable plot twist is entertaining. While it doesn't have anything that's shout-out-loud shocking, it leaves you thinking whoever conceived the idea is in need of some help. Quite a sick puppy indeed.

## INSTANT PLAYER GUIDE

### THE PIANO

The first two instant player sections are to save our sanity as much as yours, since these are the two sections in the game which we'll get the most telephone calls about. If you really want to work them out for yourself, best skip the first two pieces of advice that follow.

The key to the puzzle is finding the two medallions to enter the clock tower. The gold's easy to work out, but this part was too much for some people

The five birds each represent one of the dud keys that don't make any noise when you press them, so press them in the order shown on the screenshot

### SIGNS OF THE ZODIAC

This has recently become the second favourite call from Computer and Video Games readers, so here we go with possibly the most bizarre puzzle in the game. Read this carefully as it is difficult to grasp fully. If you don't get it at first, don't worry you're not alone in your frustration. Just read it again, follow the steps and you'll soon have it sussed.

As you walk into the room with all of the pictures on the wall, have a look at the ones with numbers already next to them, and think of limbs

Taurus has four limbs, the scales have two (arms of justice, geddit?) so now when you look at the three which you have to fill in, it should be clear

If you still don't get it, then here is the answer: Sagittarius is six (two arms, four legs), Taurus is four (all legs) and Gemini is eight (four for each twin)

## MULTIPLE ENDINGS

The benefit of playing the game thoroughly only becomes apparent as you get to the final stages of the game. Objects you may not have picked up, or tasks you failed to accomplish, will lead to an all-new (kind of) *Silent Hill*.

There are five different endings to *Silent Hill*, which you'll get depending on how you perform in the game. The fifth is a secret option called Next Fear, which you get by completing the game with a Good+ rating

The remaining liquid is emptied into the **Plastic bottle**.

When you visit the hospital for the first time, remember to pick up a plastic bottle in the kitchen and use that to scoop up the liquid behind the desk in the director's room. We won't tell you what it's for, but it's VERY important

Yes  
No

There is a **Channelling stone**. Take it?

To get the secret ending you need to finish the Next Fear mode and use an item you only get in that, called the channelling stone. You then need to use this at five locations to give you the final and complete ending

## EXTRA WEAPONS

Once you finish the game, you're given a screen detailing everything you've done throughout; the amount of kills with weapons and saves used for example. It also gives you a rank, which leads to the discovery of new weapons.

Yes  
No

There is a **Rock drill**. Take it?

Bad, Bad+, Good and Good+ are the four ranks available, the better your rank the more additions to your arsenal you'll get. The rock drill and chainsaw are the first two

Yes  
No

There is a **Gasoline tank**. Take it?

You may have found these but the gasoline needed to power them doesn't become available until you're in Next Fear mode. Even then, you can only use one of these new items

Also hidden in the game is a katana and hyper blaster and getting those is REALLY tough. We think it's something to do with the amount of saves, but don't take our word for it

## INSTANT PLAYER GUIDE INSTANT PLAY

### MAPS

Just a quick one this. The maps are an incredibly helpful and essential piece of kit that you need to make sure you have at every possible opportunity. Here are a couple of pointers, just in case you get stuck along the way.

The maps are always found right at the start of every major level, so look out for them. There's one in the cafe at the start, and one in the reception of the hospital

If you check the map, it will add arrows and annotations once you've been to certain areas. You can check where you've been and what doors are locked, for example

## WHAT WE THOUGHT

### FIRST IMPRESSIONS

Having been hyped up as the next big *Resident Evil*, to be honest *Silent Hill* can only be described as a let-down. It doesn't better *Res Evil* in any way. It looks nice but the control system lets it down too, especially the supposed auto aim which we found wasted more bullets than ones which actually hit.

### NOT EVEN SCARY

There's also the simple fact that it's in no way scary at all. The levels are all too similar and the set piece sections are all too obvious (like rattling cupboards) to make any difference. Some of the conversations between the characters seem so false it ruins any tension.

### THE VERDICT IS...

There is no doubting that it is a

good game and we recommend you try it. But when you compare it to *Res Evil* as we have throughout this review, and as Konami have by billing it as a horror game, it simply doesn't cut the mustard. Some people will find some enjoyment in this game, but as there isn't as much to do or kill here, I'm afraid it leaves you rather unfulfilled.

**W**ith PlayStation being so popular and enormous amounts of money being involved in each game released on it, developers have become scared of trying out

original ideas. *Ape Escape* is an exception - a big budget title from Sony's own designers which uses tons of new ideas in a good-looking 3D cartoon style. It's also the first game to be released which won't work with a standard PlayStation joystick.

Instead, you need at least an Analog Joypad - preferably a cool Dual Shock. If you're silly enough to ignore anything which appears even slightly cute, you're going to miss out on a real kick-ass bit of monkey magic from *Ape Escape*.

## FUNKY MONKEYS

Each level gives you a target number of monkeys to find and catch, though there are always some you can't get to the first time around. Later on, you'll need to travel back to early stages to get every last ape. Once you've caught a monkey he's added to your Monkey Book, where you can see every last one's name, statistics and personal information.

Each monkey has its own personality and will react differently as you approach them. The colour of the light on their head shows how alert they are - when it goes red, there's a chance they'll attack

There are some quite amusingly-named monkeys to find - Spank (he's losing his sight), Hey-hey (he's a monkey), etc - and you can even collect Posh's Spicey buddies if you search hard enough

## INSTANT PLAYER GUIDE

### CONTROL YOURSELF

*Ape Escape* is the first PlayStation game to only work with the Analog and Dual Shock joypads and, as such, has an unusual control system. Here's a guide to the basic skills you'll need to learn early on in your quest.

To move Spike around, push the left stick in whatever direction you want to go. The right stick controls your selected item

Pushing the left stick down makes Spike crawl, letting him sneak up on monkeys. Hold the right stick simultaneously to hide

You can assign up to four items to any of the four main buttons, letting you switch between them at any time

## GO GO GADGET GADGETS

As you work through the game, your professor friend develops new pieces of technology which will help you in your quest to capture all the escaped monkeys. You can switch between these gadgets at any time during the game, and will often need to use a combination to get the trickier apes.

**STUN ROD:** This standard lightsaber look-alike is used for destroying enemies or stunning monkeys for a few seconds. Always keep it handy

**RC CAR:** Being small, it can be driven through tiny gaps. Use it to collect distant items, destroy enemies or round up scared monkeys

**MONKEY RADAR:** Scan the area to locate any monkeys, then use the long-distance camera to see their statistics and what they're up to

**HULA-HOOP:** Spin the right stick quickly to start hula-hooping, letting you run quickly and damage enemies simply by touching them

## FREE GAMES INCLUDED

On most stages there are hidden bonus icons to collect, which you can use to open up extra bonus games from the main base. These games are very different to the usual levels and provide a brilliant break from the ape-collecting action. Each one even has its own title screen and set of options.

There are a number of bonus icons on most stages, some of which are deviously hidden. Once you've been given a few new gadgets, it's often worth returning to earlier levels to search for bonuses

The *Ski Kids* bonus game can be played once you collect ten bonus icons. Use the analogue sticks to control each of your rocket skis separately, trying to win on each of the three racecourses

*Specter Boxing* sees you take control of a monkey in a boxing tournament, with each analogue stick controlling one of your ape's arms. Random swinging will get you nowhere – it's all about timing

# 'A real kick-ass bit of monkey magic'

## INSTANT PLAYER GUIDE INSTANT PLAY

### CONTROLS... CONTD

Water plays quite a big part in many stages throughout the game (especially the Jungle River section) so learning how to swim is very important. And whatever you do, don't forget to keep an eye on your air gauge in the top-right corner of the screen, otherwise you'll drown.

Holding the R1 button makes your mini engine power you along underwater, while pushing the left stick down makes you dive. Push the right stick to fire monkey nets

At times you need to avoid going in the water (like when you're near this giant electric sea monster), so you must use a rowing boat. Rotate the sticks to move the oars

## WHAT WE THOUGHT

### MONKEYS ARE FUNNY

*Ape Escape* is very light-hearted, with amusing set-pieces and comedy monkey names to keep you smiling even when you can't catch that last damn dirty ape.

### CLEVER CONTROLS

The Dual Shock-only controls work brilliantly once you get used to them. Being able to move and use items independently makes a lot of sense, and means you must learn different skills for different items – rotating the sticks to 'row' the oars of a boat is an excellent idea.

### LOADS TO DO

The game eases you into the action nicely and teaches you all the skills you'll need on the way. Once you've finished all the stages (and there are tons to get

through) there's still lots to do, with extra monkeys and bonus icons to find. The bonus games are more than quickly knocked-up afterthoughts, and provide many more hours of fun. Though it's frustrating in places, *Ape Escape* is a game which will appeal to all kinds of people – it even provides just the kind of challenge really experienced game players have been crying out for.

# MULTIPLAYER GAMES

When you've been out in the sun all day playing footie/cricket/swingball/whatever and have a serious ice pole-induced headache, move indoors with some mates for a bit of multiplayer gaming. Here are ten of the best for whiling away those long summer evenings.

<p><b>INTERNATIONAL TRACK &amp; FIELD</b> PlayStation £19.99</p> 	<p><b>NUMBER OF PLAYERS</b> With a Multitap, four people can play at once. You take it in turns for some events, and all play at once in others.</p> <p><b>WHAT DO I HAVE TO DO?</b> Compete in 11 events, trying to win as many medals as possible. Crazy fast button-tapping skills and perfect timing are needed if you're going to break world</p>	<p>records here.</p> <p><b>HOW COMPETITIVE?</b> The eight seconds or so of the 100 Metres is some of the most competitive gaming time you'll ever spend.</p> <p><b>SATISFACTION GUARANTEED</b> Watching a friend grimacing and gurning like a loon as they concentrate intently on bashing the buttons as quickly as possible.</p>	<p><b>MULTIPLAYER RATING</b> Though some events are tricky the first time through, this will soon become a favourite for quick multiplayer sessions. You'll be playing this one for years to come.</p> <p>☺☺☺☺☺</p>	 
<p><b>SATURN BOMBERMAN</b> Saturn (PlayStation, PC, Mega Drive, Super NES, Nintendo 64 variations also available) £19.99</p>  <p>© Hudson</p>	<p><b>NUMBER OF PLAYERS</b> Up to five people can play with one Saturn Multitap, but if you've got enough pads and friends you can get 10 people playing on a special miniature level.</p> <p><b>WHAT DO I HAVE TO DO?</b></p>	<p>Drop bombs in grid-style levels to blow up all the other players. Power-ups give you more powerful bombs, and kangaroo-style Louies give you extra skills.</p> <p><b>HOW COMPETITIVE?</b> The action can get extremely frantic, and personal grudges will soon develop between players who keep running into one another.</p>	<p><b>SATISFACTION GUARANTEED</b> Trapping a friend in a corner with two bombs, then watching them wriggle helplessly until the timers run out and blow them to pieces.</p> <p><b>MULTIPLAYER RATING</b> The Saturn-only ten-player mode is a novelty not many people will get to experience, but things are just as fun with four players.</p> <p>☺☺☺☺</p>	 <p>The arena shrinks as your time runs out</p>
<p><b>SUPER MARIO KART</b> Super NES (N64 variation available) £19.99</p> 	<p><b>NUMBER OF PLAYERS</b> The Super NES version allows two people to play at once, but 'winner stays on' matches with a gang of friends are always brilliant. Up to four can play <i>Mario Kart 64</i>.</p> <p><b>WHAT DO I HAVE TO DO?</b> Drive your go-kart around the circuits, picking up weapons to help you</p>	<p>get that first place. In battle mode, just hit your opponent three times to burst their balloons.</p> <p><b>HOW COMPETITIVE?</b> Although it looks cute, <i>Super Mario Kart</i> is arguably the greatest racing game ever.</p> <p>Master the karts, learn</p> 	<p>the circuits, then settle down for a lifetime of intense competition.</p> <p><b>SATISFACTION GUARANTEED</b> Getting a turbo mushroom towards the end of the Luigi Circuit race, then using it to make the tricky shortcut, stealing first place right at the line.</p> <p><b>MULTIPLAYER RATING</b> <i>Super Mario Kart</i> is the best multiplayer racing game in the</p>	<p>world. <i>Mario Kart 64's</i> four-player mode is fun, but not on the same kind of scale.</p> <p>☺☺☺☺☺</p> 
<p><b>MICRO MACHINES V3</b> PlayStation, N64, PC (and more) £19.99</p> 	<p><b>NUMBER OF PLAYERS</b> There are modes designed for one, two, four or even eight players at once – two</p>	<p>people play on each joypad at the same time.</p> <p><b>WHAT DO I HAVE TO DO?</b> Race tiny toy cars around the house and garden, trying to get enough distance between you and the other</p>	<p>players that they get forced off the screen.</p> <p><b>HOW COMPETITIVE?</b> Good players will be able to race neck-and-neck for ages and there are plenty of opportunities for using dirty tricks to knock people off their line and out of the race.</p> <p><b>SATISFACTION GUARANTEED</b> While riding a sponge raft across a sink, knock all the other players</p>	<p>into the water then ride across, honking your horn all the way.</p> <p><b>MULTIPLAYER RATING</b> The variety of courses and vehicles means you'll never get bored of the <i>Micro Machines</i> games (<i>Micro Machines 2</i> on Mega Drive is the best of the lot, plus it has two extra joypad ports in the game cartridge itself).</p> <p>☺☺☺</p>
<p><b>WORMS</b> PC CD-ROM, Saturn, Super NES, Game Boy, PlayStation, £19.99</p> 	<p><b>NUMBER OF PLAYERS</b> Up to four teams of worms can compete in one battle and you can have four people on each team if you want. You take it in turns so you only need one controller, too.</p> <p><b>WHAT DO I HAVE TO DO?</b> Command a team of hardcore worms in battle, choosing their positions, weapons and tactics.</p>	<p>Make sure you give them hilarious names before you start though.</p> <p><b>HOW COMPETITIVE?</b> You can get quite attached to certain worms, and will want to exact vicious revenge on</p>	<p>anyone who dares kill your favourite. It may be slow-paced, but <i>Worms</i> is certainly intense.</p> <p><b>SATISFACTION GUARANTEED</b> Placing a grenade perfectly so that it hits your opponent's prize</p> 	<p>worm, knocking him squealing down a hill (hitting four mines on the way) to his comedy death.</p> <p><b>MULTIPLAYER RATING</b> <i>Worms'</i> sense of humour is painfully tragic, but ignore the lack of style and you'll have a fantastic time. Four people can play with just the one controller if you want, too – great if you're poor.</p> <p>☺☺☺☺</p>

## MULTIPLAYER RATING

We've awarded each of these games a number of smiley faces to indicate just how great they are in multiplayer mode, rather than give them an overall rating. The more happy people you see with a game, the more fun you and your mates are likely to have if you have a multiplayer session on it. But we recommend you check all these out anyway.

Get everyone round, this is the absolute business

As mutliplayers go, you and your friends will enjoy it

Good, but there is better out there worthy of your time

Your mates won't thank you for wasting their afternoon

Forget it, you're better of playing with yourself...

### QUAKE

PC CD-ROM (N64 and Saturn variations also available) £19.99

#### NUMBER OF PLAYERS

There's no limit if you're playing on the internet. Some stages are perfectly designed for just two people, while others cater for over a hundred at once.

#### WHAT DO I HAVE TO DO?

Kill everyone else. Pick up some guns, some armour, and blow whatever you can out of everyone else more times than they do

you. Pure, simple gameplay.

#### HOW COMPETITIVE?

Some people take *Quake* a bit too seriously, but with almost unlimited scope for learning new techniques there's a hell of a lot to play for. Making

other players scream with frustration is very entertaining.

#### SATISFACTION GUARANTEED

Collecting the Quad Damage and wiping out ten players in as many seconds. The gurgling noises and flying torso chunks

will bring a smile to even a pacifist's face.

#### MULTIPLAYER RATING

Because *Quake* is such a simple yet perfectly-tuned game, players' personalities show through in their playing styles. Even over the internet, this is the most personal and skilful multiplayer game in the history of the world.

### STREET FIGHTER ALPHA 3

PlayStation, Arcade, Dreamcast (many other variations also available) £44.99

#### NUMBER OF PLAYERS

Two people go head-to-head at once, but the *Street Fighter* series is known for its 'winner stays on' brilliance. Even watching other people play is fun.

#### WHAT DO I HAVE TO DO?

In a best-of-three rounds fight, knock out your opponent with special

moves and attack combinations.

#### HOW COMPETITIVE?

*Street Fighter 2* changed fighting games forever, and the series has improved massively since. It's faster, has more characters, more moves and more scope for winning - with style!

#### SATISFACTION GUARANTEED

Finishing someone with a massive 20-hit Super Combo. Or finishing

them with an Alpha Counter. Or even finishing them with an annoyingly-weak jab to the shins.

#### MULTIPLAYER RATING

If two closely-matched people are playing, *Street Fighter* sessions can go on for hours and hours and hours - and be fantastic fun for every second. Everyone should learn at least one *Street Fighter*.

The Sonic Boom - a *Street Fighter* fave

### GOLDENEYE

Nintendo 64 £49.99

#### NUMBER OF PLAYERS

Four people can play at once, either all against one another, in pairs, or (in some game modes) with three players ganging up on one poor soul.

#### WHAT DO I HAVE TO DO?

At its most basic level - shoot everyone else. There are loads of variations on the normal deathmatches, including

favourites like Capture The Flag.

#### HOW COMPETITIVE?

Shooting friends is always going to bring out your competitive side - especially if you're playing with One-Hit Kills mode on.

#### SATISFACTION GUARANTEED

Following someone around the level for ages, then shooting them the split-second they turn round and see you standing there.

#### MULTIPLAYER RATING

On a small TV the four-player split-screen graphics are a bit fuzzy and awkward to see, but with so many options and characters to play with you won't get bored. Even if you tire of the standard game modes it's easy to invent your own rules for special comedy deathmatches.

### ISS PRO '98

PlayStation (Nintendo 64 variation available) £44.99

#### NUMBER OF PLAYERS

*ISS Pro '98* on PlayStation only lets two people play at once, unfortunately, but the Nintendo 64 games (*ISS 64* and *ISS '98*) allow up to four to compete at a time.

#### WHAT DO I HAVE TO DO?

It's a football game - you kick the ball into the opposing goal more times than they kick it into yours. This is a revolutionary idea.

#### HOW COMPETITIVE?

hundred miles an hour. And beat the flaming heck out of all opposing players on the way.

#### HOW COMPETITIVE?

Because it's possible to smack into other players and even start fights, the temptation is always there when you get frustrated. Real-life physical violence between angry players is also possible.

#### SATISFACTION GUARANTEED

Scoring a quality goal in *ISS* will make just about anyone spontaneously run round the room, shouting and screaming in the face of the other player. So, yes - it's fairly competitive.

#### SATISFACTION GUARANTEED

Having your star forward make a mockery of the other team's defence, then chip the ball over the advancing keeper's head.

#### MULTIPLAYER RATING

*ISS* doesn't have the flashiness of other footie games, but it plays better than them all.

### NHL '99

PlayStation, PC CD-ROM (Mega Drive and Super NES variations also available) £44.99

#### NUMBER OF PLAYERS

With a Multitap, up to four people can play at once. Because there aren't so many people on an ice hockey team, you don't need to change players as often as in other sports games.

#### WHAT DO I HAVE TO DO?

Speed around on the ice, trying to slam a solid disc past a heavily-armoured goaltender at over a

hundred miles an hour. And beat the flaming heck out of all opposing players on the way.

#### HOW COMPETITIVE?

Because it's possible to smack into other players and even start fights, the temptation is always there when you get frustrated. Real-life physical violence between angry players is also possible.

#### SATISFACTION GUARANTEED

Winding up your opponent's star player until he starts a fight, then handing him the beating of his life so he has to lie dribbling in hospital for the rest of the game.

#### MULTIPLAYER RATING

The high-speed, violent yet skilful action means match-ups can get extremely heated. Great if you've got a point to prove.

Go on - hit him! Harder! Go for the eyes

# BUY MORE GAMES PAY LESS MONEY

Want to know where the cheapest deals on the best games are? We've done the work for you, welcome to bargain city

**WORDS: PAUL DAVIES PHOTOS: GUS GREGORY**

**T**his is officially your best opportunity to buy games. In fact it's even better than that, since if you know where to shop you can pick up a console for little more than the cost of a full-price game. Double bargain.

This month Computer and Video Games checked out major stores up and down the land to hit on the best deals around. We have highlighted options that we think would suit most people's tastes. Though you should also read through the small lists we've made of games we personally think are a steal. Go for it.

## WHAT? A NEW CONSOLE FOR £50

First up it's worth considering the other machine. Don't tell us you've never thought of buying into what the opposition is offering, there have been too many great games on only Nintendo or PlayStation not to. Here's what we consider to be the best deals on consoles.

### NINTENDO 64

#### ■ SLIMLINE OPTION

**£49.99 at MVC**

This was the deal that struck us right between the eyes. We seriously recommend you choose this option next time you have 50 notes to spend on yourself. Available while stocks last.

#### ■ BEST FOR VALUE

**£99.97 at Comet**

**Comes with *Mario 64* or *Goldeneye* plus any Pick and Mix game**

You're getting one game for minus two pence – the Official Nintendo Hardware Pack is normally £99.99 and only includes *Mario 64* or *Goldeneye*.

#### ■ BEST FOR QUALITY

**£134.98 at HMV**

**Hardware Pack, plus any game costing £34.99 or more. You get a free Player's Choice game of your choice**

This one is for treasure hunters who want to make sure they get only the blockbusters.

### PLAYSTATION

#### ■ SLIMLINE OPTION

**£89.99 at Computer Exchange**

You can secure a Dual Shock pack from Computer Exchange by mail order. At £89.99, it's a bargain.

#### ■ SOME BAGGAGE

**£99.99 at Blockbuster**

The machine is full price but you get £50 of rental vouchers, which is a fantastic deal.

#### ■ BEST FOR VALUE

**£119 at Comet**

**PlayStation plus two Pick and Mix games.**

Choose from *Tomb Raider 3*, *World Cup '98*, *Abe's Exoddus*, and *Premier Manager '99*.

#### ■ BEST FOR CHOICE

**£134.98**

**PLAYSTATION PLUS ANY GAME COSTING £34.99 OR MORE YOU GET A FREE PLATINUM GAME OF YOUR CHOICE**

You're getting a free Platinum game, which is a good deal. It's more costly than Comet, but the choice of games is yours.

### WHAT'S PICK AND MIX?

The Comet Pick and Mix is a range of games for you to choose from when you buy a console. It includes big titles like *Tomb Raider III* and *World Cup '98*, but changes all the time.

## PLAY GREAT GAMES AT POXY PRICES

### NINTENDO 64 GAMES

The best time to stock up on N64 games is when you first buy the machine, as there aren't so many bargains when you're just buying software. After trawling the high street, the best all round prices that we could find were at HMV, who have a special Nintendo 64 campaign starting in July.

#### ■ BUST A MOVE 2 £17.99

Second in a brilliant series of puzzle games offers much the same thrills as *Bust a Move 4*.

#### ■ FORSAKEN 64 £19.99

Cool *Quake*-style game, in which you fly through 360 degrees to challenge the enemy.

#### ■ INTERNATIONAL SUPERSTAR SOCCER 64 £19.99

There's an updated version out there but the original plays just as well in most respects.

#### ■ TUROK: DINOSAUR HUNTER £19.99

Brilliant first-person adventure. Better than the sequel in terms of drama. And price.

#### ■ WETRIX £17.99

Great puzzle game that scupid people have ignored, which has allowed this bargain price.

#### ■ WWF WARZONE £22.99

Looks and plays almost the same as *Attitude*, minus a few moves and options. A steal.

### PLAYSTATION

The best deals around for PlayStation are at **Our Price** and **Virgin**. You can pick up two Platinum games for £30 at **Virgin** while **Our Price** have a small selection of high-profile titles at two for £40. Here are the ones that we think are stand-out mega deals.

#### ■ DRIVER £39.99 including-memory card at Blockbuster

You need a memory card for PlayStation, no matter what. So getting one free when you buy this ace new stunt-driving game is like getting this brilliant game for half price.

#### ■ ABE'S EX ODDUS 'Two for £39.99' at Our Price

Second platform game in which your character talks to others using a system called Game Speak.

#### ■ FINAL FANTASY VII Two for £29.99, Virgin

Epic RPG featuring some of the best graphics on PlayStation, and a plot that betters most new Hollywood releases.

#### ■ COLIN MCRAE RALLY Two for £29.99, Virgin

Ranks in the top three PlayStation racers. It's more realistic than *Gran Turismo*, and more exciting.

#### CIVILISATION II

Expand your horizons at a low risk cost. In-depth strategy that will have you hooked for months.

**£39.99** at Our Price

#### SUPER MARIO 64

Challenging, and always wonderful to look at. Get this even if you own *Banjo Kazooie*.

**£34.99** on **Player's Choice**, or part of HMV's hardware deal.

#### TOMB RAIDER III

The most outstanding game in **Comet's Pick and Mix**. An essential part of your collection.

Included with **Comet's Pick and Mix** deal.

#### GOLDENEYE 007

The reason PlayStation owners are secretly so jealous of N64. This game has no equal.

Comes as part of **Nintendo's Hardware Pack**, or **Comet Pick and Mix**.

## WAKE UP!

Finding the best deals is no mystery. Resist impulse buying and take ten minutes instead of five patrolling the high street. So get to it. While you're at it, write and let us know of any great deals you think Computer and Video Games readers should know about. Mail your letters to: **BUY MORE PAY LESS**, Computer and Video Games, Angel House, 338-346 Goswell Road, London EC1V 7QP.

### BODY HARVEST

Huge sci-fi adventure with lots of puzzle elements included. An amazing, epic quest.

**£19.99** on Platinum.

### LYLAT WARS

The best space battle game with asteroid fields, enemy bases and immense alien bosses.

**£34.99** on Player's Choice, or part of HMV's hardware deal.

### TOMB RAIDER II

This series gets better with each installment. Part II is a great introduction to Lara though.

**£19.99** on Platinum.

### MARIO KART 64

Simply the greatest four-player racer in the world. A must have for any N64 collection.

**£34.99** on Player's Choice, or part of HMV's hardware deal.

### PREMIER MANAGER 99

Get this massively popular football management game as part of Comet's Pick and Mix.

Included with Comet's Pick and Mix deal.

### WAVE RACE 64

You can almost feel the spray as you bounce along realistic waves in this superior racer.

**£34.99** on Player's Choice, or part of HMV's hardware deal.

### ISS PRO, PLAYSTATION

Computer and Video Games readers voted this their favourite football game.

**£19.99** on Platinum.

## DIE HARD TRILOGY

I've got to the third bomb car in *Die Hard with a Vengeance*, the one with the hotdog on top. After that I can't find the next bomb. Please help me. Yours sincerely,  
**David Tagg, Edgware, Middx.**

Try out some of these cheat codes to help you find or skip past the place where you're stuck. Remember, to use them you need to pause the game and hold R2 while entering the desired code.

Circle, Circle, Square, Square, Down, Down, X, X = 999 turbos. Left, Circle, Up, Down, Square, Right = Infinite lives. To deactivate the clock, giving you time to find the next bomb, use the first controller and pause the game. Then hold the R2 button and press Right, Up, Down, Square. Some numbers will appear on screen, so then you need to hit Start on the second pad and it will say, 'Hit Triangle to toggle the game clock.' Now you can press Left or Right on the d-pad of controller two to skip levels, Circle to advance to the next bomb and Square to reset the game.

## LEGEND OF ZELDA DX

I'm completely stuck on the Game Boy Color version of *Zelda*. I can't get the second nightmare key and I've been trying for weeks. I know I've got to make the floor pattern the same by putting the blocks together, but the blocks won't budge. Please can you help?

**Philip Herrod, Alvaston, Derby.**

The first game to feature 'Carol Vorderman' as a cheat code

The blocks have nothing to with this puzzle, it's to do with the order in which you kill the enemies in the room. Push the blocks so the trapped enemy is released, and throw the pots at that to kill it. Now use your sword to kill the bat, and then the final enemy (the Stalfos) in the room. Once they're all dead, the nightmare key will appear.

## WARZONE 2100

I'm having a spot of aggro on the PC version of *Warzone 2100* and thought you might be able to help. I'm on Rickies Level 8 where you have to research the missile launch codes, but I just can't do it as he keeps on destroying my research centre. Please help me.

**Richard Berry, Birmingham.**

Try out these cheats, Richard. First make a shortcut from your Windows desktop (just right click with the mouse and you'll see the option) with the command line 'warzone.exe -lmACheatingScallyWag' then use the following codes in the game.

CTRL + M	Skip mission.
CTRL + N	Power boost
CTRL + G	Reveal all map on radar
CTRL + X	Instant research
Carol Vorderman	Sound sample
Hallo Mein Schatz	Mission skip
Normal	Change skill level to normal
Easy	Change skill level to easy
Hard	Change skill level to hard

## computer and video GAMES GUARANTEED WINNERS

A selection of the cheats we've stumbled across this month on our travels. Don't forget that if you want to send in tips, you should head for the Easy Money pages where you can earn yourself a tenner for your troubles.

### STAR WARS: EPISODE I RACER

An additional tip to the mountain of cheats you have in the Masterclass elsewhere in the mag. Start a new game and when you come to enter your initials, hold Z. Instead of pressing A to input a letter use the L button. When doing this, the letters you are inputting will flash in the bottom of the screen. Now

enter the name RRDEBUG. While still holding Z, go highlight end and hit L. Then enter your initials the normal way and during any race, press the start button and press Left, Down, Right and Up and the debug menu will appear.

### WWF ATTITUDE

Check out this huge batch of cheats to make loads more secret characters selectable. Once you've won the WWF Title in Career or Challenge mode with Normal or Hard difficulty to get these wrestlers, complete it with:

- Al Snow to enable Head
- Steve Austin to enable Vince McMahon
- Triple H to enable

Chyna

- Chyna to enable Test
- Any female created player to enable Sable
- Any male created player to enable Shane McMahon
- Billy Gunn/X Pac/Road Dogg to enable Shawn Micheals
- HBK to enable Sgt. Slaughter
- Undertaker/Kane to enable Paul Bearer
- D-Lo/Mark Henry to enable The Godfather
- Goldust to enable Marc Mero
- Owen Hart/Jeff Jarrett to enable Jerry Lawler
- Jerry Lawler to enable Brian Christopher
- Winning the WWF title as Val Venis will give you

How to make sure you get the best endings for *Silent Hill*

## BREATH OF FIRE 3

**HELP ME!** I have reached Space Station Myria and a part called Eden, where I met Teepo. After I am separated from my party, I get stuck. There is a Dragon Statue which says, 'Bow down and pray before me... I will show you the way when your heart and mind are one.' I just can't solve this one. **Jaime Palmer, Havant, Hants.**

We're not sure which bit exactly you're talking about, but here is what we think is the answer. If it isn't, write to us again with a more detailed explanation and we'll sort it out for you. Talk to the statue, then stand still and wait until Ryu starts his idle animation. Then talk to the statue again and it will tell you to go ahead. Don't bother and instead read the left plaque, then go down and left - towards the chest. You'll fall into a pit and can carry on from there.

● Thanks to Fritz Fraundorf for the info.

## SILENT HILL

**I have recently purchased the import version of *Silent Hill* and am stuck on a puzzle. I've read in places about the different endings and seeing as I got a Bad rating the first time I played, I was wondering why this is. I thought I had completed everything in the game, but obviously not. Can you shed some light?**

**Paul McSwegan, Aberdeen.**

Warning! Potential game spoilers ahead!!!! As we've touched on in the review, the key to getting the better

Check out our tips to make your free kicks totally unstoppable

ending is by finding the plastic bottle and the smashed vial of liquid. The bottle is in the kitchen and the vial is in the director's office in the normal hospital. Once you've got that in your possession, you need to throw it at Cybil at the end of the game to make her human again. This will give you the good ending, so you can carry on from there.

## ISS PRO '99

**Because you keep harping on about this game I went out and bought it. I have to say that I'm quite impressed, but there's one aspect I need to improve on and that taking free kicks. I'm guessing that someone there has a tactic to help me so can you spill the beans? Thanks.**

**Neil Watford, Tyddgote.**

Try some of these free kick techniques out:

1. If you have a kick that's about 40-45 yards away, then there's no point in shooting. Instead, use the Circle button and chip a 60% power kick into the box. This should land around the penalty box. One of two things can happen now. The goalkeeper will either come rushing out to punch the ball away - so you hit Shoot to loop it over him into the net. Or, he'll stay on his line and you need to hit X to cushion a header down to your striking partner.

2. If you're within shooting range, first make sure you have a player who's going to curl the ball away from the keeper. Check your formation before you take the kick to see who's going to shoot and then just move the ball onto a player with a different shooting foot. Now move

the player so that you're about a centimetre away from the post farthest away from the goalie. Now hold Down on the d-pad and use a three quarter power shot and it'll lift over the wall and into the top corner.

3. If you still can't manage the shot from a free kick, simply hit a low pass into the area to find an open man. If you can get a shot off with him, great, but otherwise roll it to another man either side who should have more space. Good free kicks come from lots of practice.

## ABE'S EXODDUS

**I've just got to the second disc on *Abe's Exoddus*, and have become stuck already. I've entered the Slig barracks and gone through the first path, but now I'm stuck. There's a Slig patrolling along two screens, with an electric current active on a platform above him and a lever to shut it off where he patrols. On the next screen there's another Slig who simply turns left and right on the spot right next to the exit door. Please help.**

**Duncan Johnson, Solihull.**

As far as we can remember, the best way to complete this section is to wait until the Slig leaves the first screen, then roll up to the switch. Pull it and roll back into the shadows you came from and wait for him to leave again. Now do a running jump onto the ledge above and go onto the next screen. Now roll from here off the edge of this ledge, and you'll hang onto the platform with the door on it. Wait until the Slig under the ledge is just about the turn away from you, haul yourself up and then do a running jump onto the ledge.

extra costumes in the female create a wrestler section, provided you won in Normal or Hard difficulty mode. The same applies for Mankind, but you get more male costumes. To get more hairstyles for the create section, again finish the WWF championship but this time as The Rock. The final tip is to get the No Wimps mode. Finish the WWF Title using the characters Faarooq or Bradshaw.

Make it easy to improve your lap times, find hidden secrets and unlock all the characters

## THIS MONTH: Win it all

Anything related to Star Wars is a closely guarded secret until the day of release and *Episode I Racer* is no exception. So how will three players who have never seen the game before get to grips with pods that can travel up to 600mph? We found three players, of different abilities, to discover the answers before improving their skills and make them all winners.

## TESTING How good are you?

All three players wanted to practice for a while, and then a while longer. For the inexperienced, getting to grips with this game's controls can be tough. While the others were still finishing in 12th place and struggling to go in a straight line, Gary was placing first and starting to roll the pod onto its side to clear the tighter parts of the course. Richard got better the longer he played, but was still too slow in the more twisty parts of circuits. And as for Christian, he really could do with an extra pair of hands. Three guys at three different levels; it's time to offer them some friendly advice.

## HERE TO LEARN

NAME: **CHRISTIAN ROBINSON**

AGE: **18**

LIVES: **PETERBOROUGH**

CURRENT FAVE GAMES: **FIFA '99, TEKKEN 3**

Christian's our beginner for the day. He hasn't had much experience with racing games, so we'll need to pull out all the stops to improve his lap times.

NAME: **RICHARD COLES**

AGE: **18**

LIVES: **VAXLEY**

CURRENT FAVE GAMES: **TOMB RAIDER 3, FIFA '99**

We're in Richard's house, so we'll treat him with respect, being a fan of *Gran Turismo* we reckon it'll be easy to get results from this intermediate player.

NAME: **GARY NORMAN**

AGE: **18**

LIVES: **PETERBOROUGH**

CURRENT FAVE GAMES: **1080°, FIFA '99**

Gary wants to be a policeman, but we won't hold it against him. He owns a Nintendo and is used to the tricky controls of *1080°*, which makes him our expert for the day.

## THE BEGINNER

Christian has trouble going in a straight line

### THE PLAN

Of the six racers on offer at the beginning of the game, it's best to pick Anakin. The small size of his Pod makes it easier for you to negotiate tight sections of the course and squeeze through small gaps. The stats for the Pods are pretty even, so you won't have to worry about upgrades.

### KEEPING IT SIMPLE

Christian needs all-round help, so we'll start by limiting him to only essential controls needed to play the game: the control stick and the A button to accelerate. Christian's first lesson is to hold up on the stick, this allows the pod to go slightly faster and, funnily enough, makes your Pod go in a straight line. Perhaps being a PlayStation fan he's not used to the N64's pad or analogue controls.

So, it's off to the Boonta Training Course, always holding up and slowly turning left or right, but not turning the stick to the side. Instead, pointing it at 45° angles, top left or top right. After a few laps, he learns to push the stick further left or right for the tighter turns whilst on gradual curves

keeps the stick as far forward as possible. The reason for this becomes apparent later, so it's a good idea to get into the habit now.

### MAP READING

This diet of controls improves Christian's stability after 10 mins, so what's his next problem? "I haven't a clue what's going on, some tracks are hard to see."

It's time to learn about the map which sits nicely on the right of the screen. It's there for a reason; and until you learn each course it's a good idea to make use of it. The simplest tip is to find the best time to use it, although in a game as fast as this where corners occur in the blink of an eye that can be difficult. Christian's advised to glance quickly at the map after

Start things simply by choosing Anakin

Quickly glance at the map after a bend

each corner, setting him up for the next one. Then he'll know which side of the track it'll appear on.

On straights, especially long ones, you've got more time but knowing where a corner is in advance, plus its severity, is the key to beating this game. Especially as the length of each race, and circuit,

can play havoc with your concentration levels.

### BOOST IT

The next area to learn is the right time to boost. Now that Christian is making better use of the map, this shouldn't be a problem. He's also holding up on the stick as often as

## THE INTERMEDIATE

Still struggling? You need to upgrade your Pod

### THE PLAN

Intermediate players like Richard should have a fair understanding of the basic controls and be able to finish towards the front of the pack. The next set of tips should get you winning races, and improving your Pod.

### USE THE TRUGUTS

Once you've placed well in a couple of races and have won some Truguts for your efforts, you'll want to improve your Pod. The first thing you should think about is buying a bunch of Pit Droids.

This will allow you to fix your craft if it takes a couple of knocks during a race. Once you've bought them and your engines are looking tired, hold down the right shoulder button during a race to fix any damage. Repairing your ship while on the move limits your top speed, so it's best to use it on corners and not on fast straights. That is, if you want to win.

### DEALING WITH WATTO

Richard found the buying of different parts from Watto's shop and junkyard quite confusing, "It's difficult to understand the upgrades and I'm not sure what bits to buy." Like everything, it's easy when you know how. Try taking the six different pods available at the start of the game for a spin in practice mode. After a couple of laps with each of them you should discover how traction, turning and the rest affect the handling of your Pod. Anakin, Ody Mandrell and Ebe Endocoot all have fairly decent Pods, while the others have serious flaws and Dud Bolt really is poor.

From this test it's pretty clear what each statistic means. Each Pod has different abilities and depending on who you're racing means you need to improve certain sections of your Pod before others. On the beginner tracks you won't need to worry about acceleration or top speed, as the opponents here are easy to beat. Concentrate instead on cooling – which is handy for using the boost for longer – and turning, which is essential in any racing game.

### NO BRAKES

As the courses get tougher, and your ship gets faster with your

Those pit droids sure do walk funny

winnings, you might find yourself reaching for that brake button – but don't just yet. You can also reduce your speed by holding down on the control stick, and, as you only need

# "The opponents here are easy to beat"

## THE EXPERT

Gary wants to finish the game as fast as possible

### THE PLAN

Gary has no problem winning races. As soon as he picks the game up for the first time he has a fair idea of what he's doing and needs little advice on techniques to learn. Instead, we're going to show him how to unlock all the secret Pods and how to play dirty. Welcome to the dark side, Gary.

### WIN MORE TRUGUTS

Before each race you can select how much money you can win by altering the winnings menu. There are three options: Fair, Skilled and Winner Takes All. We advise Gary to select the latter, even though he'll have to place first to win the cash. Any experienced player should be able to place first on all the courses in the beginner mode at first attempt, which allows you to buy better parts for your Pod.

### LOTS MORE PODS

The six Pods available at the start of the game aren't the only ones on offer. If you break the track records you can win extra racers, with improved abilities. The following are the hidden racers, where to find them and the times to beat.

possible, so the opportunity to use the boost is always there. You can boost whenever the yellow light is lit on the thrust meter; activate the boost by quickly releasing the accelerate button and then press and hold it again. The thrust meter will go red and your Pod will accelerate quickly.

Keep an eye on the acceleration bar, as your Pod speeds away as the engines will start to heat up and you'll have to switch off the boost before they explode. Do this by releasing the A button, pressing B or smashing into a wall or opponent hard enough. For starters, limit your boosting to long straight

sections until familiarity with the tracks and advanced controls allows you to use boost in other sections.

### STILL IMPOSSIBLE?

If you're still having problems, what can you do? How about a cheat to make your Pod invincible? It will stop you crashing, and losing vital places,

to slow down on corners, it means you can control everything using the stick. Hold down and either left or right at a 45° angle, moving the stick wider to the left or right depending on the corner. This technique can be the difference between taking a corner properly and smashing into a wall and losing

vital seconds. So now's a good time to learn how to use it properly.

### SIDE TO SIDE

The next tip is brought on by Richard finding the urge to push his Pod faster and faster. It's the roll button and is designed to be used to get through narrow sections of

the course. Use the roll by pressing either the Left or Right yellow buttons on the pad, this allows you to take a more direct route on some courses. It's not without an element of risk though as Richard soon learns, "I try to use the roll button, but I keep messing up." He's not an expert yet.

### ANY BETTER?

It doesn't take long for Christian to use these techniques to their fullest; his next step to the winner's circle should be to start learning the courses. After being thrown in at the deep end what does he think of the game? "It's great, the graphics are good, but the controls are tough to begin with and the narrow sections of the courses are difficult. You can miss boosts because you're paying too much attention to the track and upcoming bends."

but you can still hit objects that will drop your speed and have engine fires. To be invincible, select an empty game save, and keep holding the Z button while you select the following letters with the L shoulder

## THE INTERMEDIATE

Watto doesn't sell him junk anymore

Jumping is easy, try boosting in mid-air

Richard still needs a bit more practice

smashed into you while you're jumping makes you plummet to the ground. Not good.

### ANY BETTER?

Richard has got the instincts of a racer, but lacked some techniques to get him to the front of the pack. After a couple of hours was soon getting used to the new controls and even experimenting with some different Pods.

With comments like, "I can tell this one's not as responsive," he's definitely on the right track, but what does he think of the experience? "I'm surprised how fast it is, especially on the tighter tracks. It takes time to learn but the controls work really well and the upgrades allow you to keep improving your lap times."

There's another button to learn as well, it's the Z. You can use it your advantage to slide the back of the pod around corners. It's a fast technique which will help you and also looks pretty cool. However, it's not an essential control and, for now, you can do just as well without it if you find it too difficult.

### JUMPING GAPS

Richard is soon racing easily around the basic courses and is ready for the final technique - how to jump large gaps. When you approach one, hold back on the control stick which makes you jump higher, putting you out of reach of other Pods. It's handy, because being

When you've finished select End, press L, then enter your name in the normal way. Your two pads should be plugged into the first and third ports on the console; push forward on both sticks to accelerate, pull back to steer, and press Z to boost.

### PLAYING DIRTY

Gary doesn't need any encouragement to try this out. Get a bigger Pod and you'll be able to smash smaller opponents into the walls and out of contention. "They

do it to you, so why not give some back?" said Gary. The only weapons in the game comes when you unlock Sebulba. Then, if you double tap the R button you can use his flamejet - use it to set opponents' on fire.

### ANY BETTER?

For Gary it wasn't a question of getting better but of completing the game as fast as possible. With the information of how to unlock the other racers he's well on his way to finishing the game, plus finding new ways to shave seconds off those lap times. "The controls for the game are really nice, just right, they allow you to really exploit the courses. I'm not going to stop playing until I've found all the characters."

Ressa's, the code you need is RRCYYUN, then highlight End and press the left shift button, then A.

## PLAYSTATION

A bunch of cheats and tricks from Pete Mottram from Derby, he gets a nice crisp tenner for his efforts.

### ■ NEED FOR SPEED: ROAD CHALLENGE

#### Dashboard View

Select any mode, track and car. Press Start on the race icon (at the car selection screen) then immediately hold Up+Triangle+X before the loading screen appears. Hold this until the race begins.

#### Drunk Mode

Pick a car and start a race. Immediately press Up + L2 + R1 and hold during the loading screen. The screen will now be

Richard Brunson dead ahead, step on the gas

blurred as if you were drunk. How useful.

#### Easier Tickets

Choose Pursuit Mode and pick a cop car. When the game begins, hold L1 and press Up to turn off your sirens. The person running will slow down. When you catch up, press L1 and Up to turn your sirens back on, then pull him over.

#### Easy Money

After buying your first car go to the two-player mode and select High Stakes. It will then ask you if you want to save; select Yes.

Access memory slot 1 and it will ask for memory card 2. Take the card out of slot 1 and place it in 2. The game will think it's a different memory card and will duplicate your car. Now all you have to do is beat yourself and sell the car you won.

#### Extra Music Tracks

Choose audio options from the main

menu. Then go to the CD player. Go all the way to the bottom, and there are two music tracks that are turned off. Just turn them on and you can listen to them while you're driving.

#### Headlights and Turn Signals

While racing, hold L1 and press Left or Right for the indicators. Hold L1 and press Up for the headlights. Hold L1 and press Down to turn on your hazard lights.

#### Heavy Car

Before the loading screen appears to load your next race, press Start to load the game and immediately after, press and hold Left + Square + Circle. Continue to hold the buttons until loading has finished. You will now be able to knock over other cars when bumping into them.

#### Phantom Car

To get the phantom car, enter your name as FLASH. You can't save if you use this code.

#### Police Helicopter

To pilot a police helicopter in test drive mode, enter your name as WHIRLY, then enter test drive. You can't save if you use the code.

#### Super Cop Cars

To get the Super Cop Cars, Arrest ten speeders within the given time limit.

#### Titan Car

Enter your name as HOTROD and you'll get a beast of a car to use. Again, you can't save the game with this code.

### ■ MARVEL SUPER HEROES VS. STREET FIGHTER

This is a rather poor conversion of this epic fighter but there are still lots of cheats to be had, so if you have got the game, at least you should get a little more fun out of it.

**Thanks to Shaun Harris from Aldershot and Deepak Choudhury, from Birmingham**

To access the cheat menu press R1, Circle, Left, Triangle, Triangle. Use this code to also open a hidden extra options

screen; highlight options and enter the same code.

#### Play as Apocalypse

Complete the game without using continues. On the character select screen, highlight Akuma and press Select six times, followed by any punch or kick button.

#### Play as Armoured Spiderman

Highlight Spiderman at the character select screen, hold Select followed by any punch

or kick button.

#### Play as Cyber Akuma/Gouki

Complete the game without using any continues. Go to the character select screen, highlight Akuma and press Select five times, followed by any kick or punch button.

#### Play as Evil Sakura

Highlight Hulk at the character select

screen, then hold Select and press any button.

#### Play as Grey Hulk

Using the Evil Sakura code, select Hulk as her partner and you'll now have Grey Hulk.

#### Play as Mech Zangief

Highlight Blackheart on the character select screen and hold Select followed by any button.

#### Play as Mephisto

Highlight Omega Red on the character select screen, hold Select followed by any button.

#### Play as Shadow

Highlight Dhalsim on the character select screen, hold Select followed by any button

#### Play as U.S. Agent

Highlight Bison/Vega on the character select screen, hold Select followed by any button.

#### Play as your Second Character

In battle mode, beat the opponent and your character will start their victory pose. Press the R2 button and in the next game you fight as your second character.

Do the braking drift over a ramp (press A and B while turning).

### ■ MEGA FLIP (2 trick points)

Go over a ramp on two wheels by double-tapping A as you're turning before taking off.

In championship mode you get given extra bits and pieces for earning enough points. Here's what you should be working for:

POINTS	PRIZE
8	Power level 2, max speed 160
20	Paint job
100	Power level 3, max speed 178
150	Two-tone paint job
500	Power level 4, max speed 189
1,500	Power level 5, max speed 208
9,999	The awesome Speed Demon

### ■ F-ZERO X

To get all the cars, tracks and different difficulty levels then press the following buttons at the Mode Select screen: L, Z, R, C-Up, C-Down, C-Left, C-Right and Start. You should hear a chime if you enter the code correctly.

Jon Bright, Cardiff

### ■ A BUG'S LIFE

Fantastic film, not so great a game, but if you want to skip through the levels just try this. On the main screen go to the ant hill, and hold Z, all the C buttons together and

press R. There should now be an arrow pointing right at the bottom of the screen.

Carl Peters, Orpington

### ■ MARIO PARTY

The crane game, grab what you can and drop it down the pipe

There are three secret characters in this wacky board game, to get them hold down Z, while pressing A and Start simultaneously. You must have 15 stars to make the code work. The three characters are Banjo-Kazooie, Kirby and Mew.

Robert Patterson

## PC CD-ROM

Some very handy cheats sent in by Joe Burton from Carmarthen and Andy Lyle from Bagshot. Why spend precious time planning and building the perfect city, when you can cheat your way to success?

If you build it they will come

### ■ SIM CITY 3000

To give yourself access to all the buildings in the game, follow these instructions. They should make it a whole lot more fun to play. Open and close the power plants menu. Open and close the rewards & opportunities menu. Open and close the garbage disposal menu. Open the landmarks menu (everything should be available). To get all the ordinances, press Ctrl+Alt+Shift+C then type "I like red tape" and press Enter. To get free gifts, press Ctrl+Alt+Shift+C then type "Pay tribute to your king" and press Enter. To make all the buildings and things free, press Ctrl+Alt+Shift+C then type "I am weak" and press Enter. To get a massive UFO invasion, press Ctrl+Alt+Shift+C then type "UFO swarm" and press Enter. Now go to the disasters box and start a UFO attack.

To call in Cousin Vinnie, press Ctrl+Alt+Shift+C then type "Call cousin Vinnie" and press Enter. A new petitioner item will appear showing a local fundraising event, which will give you extra cash if you choose it. To get a castle, press Ctrl+Alt+Shift+C then type "zyxwvu" and press Enter. This will only work if you've already used the "Call cousin Vinnie" cheat and refused his offer. To modify the terrain, press Ctrl+Alt+Shift+C together, then type in one of these codes and Enter. **Load terrain** allows you to load a grayscale image as terrain. **Salt on** turns fresh water into salt water. **Salt off** turns salt water into fresh water. **Terrain one up** raises terrain up one. **Terrain one down** lowers terrain down one. **Terrain ten up** raises terrain up ten. **Terrain ten down** lowers terrain down ten.

## GAME BOY COLOR

Anthony Fanshaw from Banbury has sent in these cheats to this great Game Boy game. Another £10 has found a new owner.

### ■ TETRIS DX

To get two different screen savers turn the game on and wait for the demo to start. Press Select and a fish screen saver will start, or press Start and a confetti screen saver will be displayed.

You can also cheat by moving blocks up the screen instead of down, thanks to a tasty bug in the game. First move the falling piece to the extreme left of the playing field, and keep holding, then quickly tap A repeatedly to make the piece move up the screen. You can also do this on the right side of the screen, but you need to press B to make the block rise. This cheat won't work on straights, or on the square pieces.

If you want to prove you're a Tetris master, and feel you can play the game without having the preview of the next piece, then press Select to make the preview disappear. To get it back just press Select again. Finally, you can have a break from playing, and still pick-up from where you left off, by pressing Start before you turn your Game Boy off. When you turn the machine back on you'll see a "Continue?" message, which allows you to carry on where you left off.

### ■ RUGRATS

Here are some cool and useful level passwords for this popular game.

LEVEL	PASSWORD
2	RQVDHJW
3	TQMMY QK
4	BVBYFJND
5	RJDBCVRT
6	VNGBLJCV
7	BJGSMVSH
8	LJTBWGGD

Jane Goodge from Whittam, Essex

### ■ V-RALLY COLOR

When playing in arcade mode to get the later levels use these codes: to get to the medium stage, enter the password "FAST". To get to the hard stage, enter the password "FOOD".

### LETTER OF THE MONTH LAST NIGHT A VIDEOGAME STOPPED A FIGHT

I work as a bouncer. One night my colleagues and I were standing at the door of the bar discussing the usual rubbish: football, sex, girls and more girls when our talk turned to *Metal Gear Solid*. I was in the middle of telling my work-mate about the Claymores I used to battle Vulcan Raven, when a smash was heard from inside the bar. We ran inside to find two men having a Mexican stand-off, waiting for each other to move first. Grabbing one each, we led them to the door. One guy left, the second, however, decided to question my parentage. Deciding the guy would probably cause a fight, I turned back to my friend and carried on my tale of the battle I had against Vulcan Raven. The drunk guy, who seconds ago was accusing me of dancing at my parents' wedding, spun towards me with a big grin and said that he was still stuck on *Sniper Wolf*! We began to talk and I explained how to beat her easily the second time using Nikitas, to which he was overjoyed. He shook my hand vigorously, saying "thanks mate".

### NO SHOW

Have you ever wondered why there are no decent video game shows on TV? The only good one is Cybernet, which is shown at 4.00am. Who wants to stay up that late to watch a games show? I've been wondering, since you've changed Computer and Video Games to be bigger and better, why don't you make a games show to be aired once a week? I'm sure it would be wicked.

*Nural Abedin, London*

Are you not aware of the invention commonly known as a video recorder?

### COINCIDENCE?

Has anyone else noticed the similarities between *Metal Gear Solid* and *Goldeneye*? When I saw Meryl Silverburgh she reminded me

immediately of Natalya Simonova from *Goldeneye*. Look at Natalya in the jungle level of *Goldeneye* then at Meryl, you'd think they were twins. The storylines to both games are very similar and you have to save Meryl/Natalya from prison. The fact that Liquid Snake and Solid Snake used to be friends but are now enemies is a lot like Alec Trevelyan and James Bond. Also, if you look at Solid Snake from a distance he looks a lot like James Bond.

*Richard Goss, Crosshands, Wales*

### CIDER DRINKER

I'm sure I speak for all Sega fans, when I say that Dreamcast is the best thing since the invention of sex. I am for sure going to get myself a Dreamcast as are 30 of my mates.

## "They reckon PlayStation 2 is already in the UK"

*Keith Hill, via e-mail*

Anyone who owns a PlayStation please give me your address so I can come around with my sledgehammer and destroy it.

*Gary Gray, Taunton*

On behalf of every other Sega fan - speak for yourself, mate.

### PLAYGROUND FIGHT

I would just like to ask you for some help. I know two twats who reckon they know loads about video games (they know nothing) and reckon that PlayStation 2 is already out in the UK (hah hah - what thickheads). Can you please tell them that they are talking from their butts and need to get a life. One who reckons PS2 is out also reckons that *Mario* came out on the Sega Master System before the NES. Now I am pretty sure that is a load of crap too. Please will you publish this so that I can go into school and say, "Hey Sam and Tom, hah hah, you were wrong."

*Keith Hill, via e-mail*

If you're so sure, why are you mocking them? But, don't worry, take relief in the fact that they are indeed a pair of thickheads, so go into school and mock them some more.

### BAD DATES

So who's waiting to get their hands on a copy of *Final Fantasy VIII* then? Do you also think it's appalling that us Brits have to wait all these months for a UK release? Not me. Why? Because I've been living in Japan since last September and the thing is, the Japanese get exactly the

It's easy, all you've got to do is send us something interesting. Could be a letter (but no more 'this or that console's crap' letters please). same deal as everyone in the UK. Earlier today I saw an advert on TV for a game that'll be out on the 18th June. That game is *Turok 2*. I'm sure there can't be anywhere near as much translation to do on that game as on *FFVIII*. That's not the only game either. I'd already finished *Banjo*

"Look me in the eyes and tell me you're not gagging for it. FFVIII, that is"

*Kazooie* back in England but was it available here? End of October. *Colin McRae Rally*? Available mid March. *TOCA 2*? Nope. *Rogue Squadron*? Nowhere. In fact, the RAM expansion

## VIVA LA REVOLUTION

When is *Pokémon* coming out? Me and my friends simply can't wait anymore and have all bought a Game Boy just to play it. Also, why buy a PlayStation now when there is a better Game Boy game than any PlayStation game and the Nintendo 64 is cheaper, more powerful and has better games? With the Dreamcast round the corner at only £200 there is even more reason to forget the PlayStation. We must go forward and leave behind the blocky, low resolution graphics of the PlayStation.

Simon Harper, via e-mail

We've had too many letters regarding the release date of *Pokémon* - it's September all right, now calm down.

isn't even available as no games out here support it yet. At least the game of last year was available here earlier. A whole two weeks! I'd like to say the two games I'm most looking forward to this year are *Perfect Dark* and *Wip3out*. But I rather suspect that I'll be playing *Gran Turismo 3* before I get a go on those.

So next time anyone moans about games taking so long to arrive in the UK, spare a thought for us lot in Japan who don't get to play some top quality titles until a good few months after the supposedly ill-treated Brits. Ed Tremaine, via e-mail

## HEAVY LOAD

I have an N64 and usually only buy multiplayer (except *Zelda*). I am really fond of the latest trend of having saved data usable in multiplayer games but the one thing that really annoys me is the actual save/load options. Why don't games have auto load/save? I recently loaded up *WipeOut 64*, took about two seconds off my Time Trial time for a track and then remembered that I hadn't loaded my data, so I couldn't save.

In *Turok 2*, everyone presses Start to join in a multiplayer game. Then one person (usually me) insists on loading their character. This pauses the game and puts the load menu on the whole screen. It's very irritating. Please Game Maker People out there, put in proper load/save features into games. Well, I'm glad I've got that off my chest.

Marc O'Morain, Dublin

## LARA'S DEAD MEAT

Lara must Die! Long live Strider! Major Skirmish, London

## MONEY UP THE ARSE-NAL

Why are Sega spending all that money on Arsenal? A big fat, fluffy waste of time. Sega have messed up big time and should pull out of hardware indefinitely and make their money through kick-ass games on the PlayStation 2 and the arcade.

Alex Clifton, Leeds

So you don't feel strongly about this point then, do you? Or are you a Man U fan and just hate The Gunners?

## LONDON SCHOOL OF ECONOMICS

Why is it that all N64 games are either cute or furry, with the exception of *Goldeneye*? This means that all games are targeted at younger people and so they will not sell as many games.

Matt Graham, London

## HAPPY REALITY

I've never been so happy. I just read on a games site that *Final Fantasy VIII* is being released on the PC just after the PlayStation version. Joy! This is particularly good for me as my two mates, who live near to me, both have PlayStations. They would have played the hell out of it so when the PC version was finally released I would have seen it all and there would have been no point buying it. I know this would happen, 'coz it happened with *Final Fantasy VII*. Also, this news solves another one of my problems, I've been trying to decide if I should have bought a PlayStation or waited for the Dreamcast to come out. I really want a Dreamcast but I didn't want to miss out on another piece of gaming history by not having *FFVIII*. So you see, I'm a very happy chappy.

Guy a.k.a. Dangermouse

## SMALL PROBLEM

Why am I crap at *Commandos*? Shay Dennis, Chelmsford

Why is the sky blue? Why don't you play something else?

## SHORT CIRCUITS

Don't you think Sony are rushing the PlayStation 2 just a bit? They don't even have a design for it yet. I think Sony are afraid. Look at it this way, Sega release the Dreamcast which is more powerful than the PlayStation and the next thing you know Sony are making the public all excited about a piece of circuitry and some old guy's face.

Liam McGuire, Ashford, Derbyshire.

You could look at it like that but the last thing that ever gets designed with a new games machine is the box they put all the circuitry inside. Probably so they can be sure it will all fit.

## PERFECT MARK

I think games are extremely overrated. *Metal Gear Solid* in my opinion couldn't ever deserve a score of 98%, that would mean that the game would be almost perfect. Even

if a game was given around 70% that would mean that it would be 70% as good as a perfect game. In years of gaming I have never played a perfect game and I don't think I ever will.

Paul O'Hanlon, Carrickaboy, Ireland

Which is why we don't rate games with daft percentages. Are you sure you're writing to the right mag?

# DON'T KNOW ONE'S BEST TO

So many arcade games to choose from: there are the good, the great and the ones that will nick all your money. Here's how to get the most fun from them

**G**oing on holiday? Leaving your console at home? Do not fear, your gaming fix can continue. All you need is to know where the best arcades are, which machines to look out for and how to avoid chuck-

ing good money after bad at them. We've compiled the perfect guide to guarantee that if you're stranded away from your house this summer, you will spot the hot new stuff from last year's luke-warm hits.

# WHICH PLAY?

# ARCADE GUIDE

## THE GAMES TO PLAY

Walk into the best arcades and you'll be engulfed by neon lit cabinets and pounding music – with hundreds of machines ready to take the coins from your pocket. If you've been away from arcades for a while, how will

you know which are the latest and best games to play? Easy, we've made a selection of the hottest arcade games right now, and can tell you what they're about and how to get the most fun from them without going broke.

### SILENT SCOPE

#### WHAT IS IT?

The latest gun game, where you train to be a sniper.

#### WHAT YOU DO

Scout around the rooftops for bad guys and pop them from way off. Later levels involve moving targets like helicopters and cars.

#### WHY IS IT SPECIAL?

The special sniper scope allows only the person playing the game to really see the action, by magnifying the images on the monitor. Anyone looking at the main screen will only see a load of buildings.

#### TIP FOR SUCCESS

Make use of the training mode in this game. Also, by spotting beautiful women through your scope you can earn extra lives, just don't shoot her.

Shoot him in the family jewels to woo chicks

#### PRACTICE AT HOME

Any gun game you have played at home will certainly prepare you for *Silent Scope*. Using the sniper rifle in *Goldeneye* definitely helps, and for reflexes and accuracy you can't beat *Point Blank*.

### DANCING STAGE

#### WHAT IS IT?

Prove your dancing skills with the multicoloured disco machine.

#### WHAT YOU DO

Dance around on the specially lit stage by following the on-screen commands. Choose the tune you want to dance to and then make sure you step on the right sections of the stage in time.

#### WHY IS IT SPECIAL?

Have you ever seen a machine like this in an arcade before? No, because it's the first arcade dance simulation game. There's even European and World championships planned.

#### TIP FOR SUCCESS

Limber up and do a few stretches before dropping the pound in the slot,

Yeah, do the funky penguin and the Smurf

and make sure you have a drink waiting when you've finished.

#### PRACTICE AT HOME

A home version is on its way but before then, try *Bust-a-Groove* on the PlayStation to learn some crazy dance moves, and some awful music.

### BEATMANIA

#### WHAT IS IT?

If *Dancing Stage* is the dancefloor, then this is the DJ booth. Cut and mix the records to prove your skills.

#### WHAT YOU DO

You get a turntable and some big buttons; use them to make music by keeping to the beat, dropping in bass lines and samples. Make your score even better with some scratching.

#### WHY IS IT SPECIAL?

Everybody wants to be a DJ, and *Beatmania* allows you to experience the thrills and skills without having to be weighed down with a ton of vinyl and buying some expensive turntables.

#### TIP FOR SUCCESS

You need to learn rhythm to play this game, so try hanging out in hip record

This is a journey into sound, techno, techno...

stores where people like to stand around nodding their heads to the beat. If you don't feel up to that, go and stand near a pneumatic drill.

#### PRACTICE AT HOME

*PaRappa the Rapper* will teach you the street smarts needed to play.

### TEKKEN TAG TOURNAMENT

#### WHAT IS IT?

Characters from the *Tekken* series battle it out in a new tag-team style.

#### WHAT YOU DO

Pick your two favourite characters to form a team against an assortment of rivals. Characters have new moves, so there's lots of new combos to learn.

#### WHY IS IT SPECIAL?

Players who like the *Street Fighter* and *King of Fighter* series may shun anyone who steps near a *Tekken* machine, but fans will be queuing up in droves this summer to prove their skills.

#### TIP FOR SUCCESS

Make sure you get the perfect team to suit your style of play, pick a quick all-rounder, coupled with a heavier fighter.

If you love Tekken, wear a nappy while playing

This should take care of whatever an opponent can throw at you.

#### PRACTICE AT HOME

Although there's loads of new moves, you'd be a fool not to practice on the previous *Tekken* games before you put money into the new machine.

### THRILL DRIVE

#### WHAT IS IT?

Rely on your reflexes to beat the busiest racing game ever.

#### WHAT YOU DO

Race across town in a variety of vehicles, built for size not speed, while trying to avoid cars, pedestrians and police. Crashing eats up vital seconds.

#### WHY IS IT SPECIAL?

Have you ever driven a bus down a crowded road at top speed and got away with it? You can in this game, plus flying through the windscreen here is a lot safer than in real life.

#### TIP FOR SUCCESS

This is a game where you progress by finishing the course, not by mowing as many people down as possible. Although the crashes are the best

It's thrilling, and you're driving – how clever

thing in the game, if you keep doing it, you'll get far less value for money.

#### PRACTICE AT HOME

The barely seen *Felony 11-79* on the PlayStation was a game ahead of its time. It shares all the same tricks and features of *Thrill Drive*.

### DAYTONA 2

#### WHAT IS IT?

Sequel to the one of the best multiplayer racing games ever.

#### WHAT YOU DO

Pick a car, then put your foot to the floor as you try to place first among the 40 cars. Eight people can race each other if the machines are linked.

#### WHY IS IT SPECIAL?

Smash into other cars in any other racer and it spells trouble, here it's part of the game. The one player mode is good, the circuits are great, but multiplayer is the real way to play.

#### TIP FOR SUCCESS

Learn to powerslide. The easiest way is by using manual gears. If you're in fourth gear while turning, brake, drop to second, and then up to third and

Like the original, but with graphics turned up

accelerate. This puts you into a slide you'll be able to control easily.

#### PRACTICE AT HOME

Play *Daytona* on the Saturn and you'll be an expert at the sequel, or find the original in the arcade; perhaps practice for a few laps first.

## AND DON'T FORGET...

If you find you're on holiday somewhere that isn't in our recommended list of cool arcades, there's an easy way to find out if you're in a place full of old tosh, or up-to-date action. Use this guide to rate the arcade you're visiting by seeing if they have these hits and misses of yesteryear. Then you'll know whether to move on or stay put and enjoy.

## CRAZY TAXI

### WHAT IS IT?

The fastest taxi cab ever – only in a game.

### WHAT YOU DO

Pick up passengers and take them to their given destinations before the timer runs out, drop them off to earn more time on the clock. San Francisco is a big city, and there are easy fares to collect, or tougher ones if you're up to the challenge.

### WHY IS IT SPECIAL?

Every new driving game from Sega deserves a look, and *Crazy Taxi* is the best for a while. It's colourful, fast but more importantly, it's fun, something that a lot of arcade games lack.

### TIP FOR SUCCESS

Scare your passenger to earn extra

Run down people with red hair to earn points

points – driving over car transporters, or on the wrong side of the road are good ways to start.

### PRACTICE AT HOME

*Grand Theft Auto* plays in a remarkably similar way. Practice and you'll be finding the shortcuts in no time.

## GET BASS

### WHAT IS IT?

A state-of-the-art game that manages to make fishing exciting.

### WHAT YOU DO

Pick a lure and try to catch the biggest Bass fish in the water before the timer runs out. Bigger fish can snap your line, but will net you more points.

### WHY IS IT SPECIAL?

The rod controller is attached to a winch that sits behind the bottom of the screen, if you've got a big fish on the end of your line, the winch tightens and you can really feel the tension. You run the risk of being pulled onto the floor by an arcade machine.

### TIP FOR SUCCESS

Pick the easy Deep Crank lure - the red one, it brings out all the fish. Bigger

He's got his crank caught in his flies, how rude!

fish like to hide in the shade.

### PRACTICE AT HOME

Play the home version on Dreamcast, but it's only available on import and quite pricey. In the meantime get tips from the old guys with boxes of worms who like to sit by the river all day.

## HOW DOES THE ARCADE SCORE?

### Under 25

A very modern arcade, every game they've got is new, but will cost you at least a quid a go.

### 25-75

Wow – old machines – ensure they don't end up as scrap by throwing some coins into their slots.

### 75-150

A large arcade that doesn't rely too heavily on the latest games. Find a balding guy with glasses and a long brown jacket – he's a technician. Tell him you put money in the machine and nothing happened – it works every time, once.

### 150-300

You must be at the seaside where the old folk and mature arcade machines can still lead a healthy life. Outside the arcade score extra points for finding a crazy golf course and old people playing bowls.

### Over 300

Go buy a newspaper and check you're still in 1999, you've just stumbled into the last world of arcades. Take photos, this is a major historical find.

## THE BEST ARCADES

So where can you play the latest games, and what are the top holiday destinations for people that want to stand in front of 50-inch monitors all day long? We travelled the country, searched the internet, asked as many of you as possible and made lots of phone calls to find the best arcades in the country.

## MAP KEY

An N in a circle means Namco, and when it comes to arcades, they're quite good.

Wow, a triple flavour ice cream in our guide, this means the arcade is near a beach.

The art editor's idea of a roller-coaster, which represents a theme park.

A ball and some pins being knocked down, it's bowling – sport of the future.

### PLEASURE BEACH, BLACKPOOL

The famous illuminations are really for the oldies but the Pleasure Beach has a load of big rides including the Pepsi Max Big One and PlayStation the ride. The brand spankingly new Millennium Dome arcade, is home to the latest games.

### NAMCO STATION, THE TRAFFORD CENTRE, MANCHESTER

The first of Namco's multi-leisure venues in the UK, featuring over 100 games, 18 full-size bowling lanes, dodgems and eight pool tables. It's clean, well lit and for the over 18s there's a licensed bar.

### NAMCO WONDERPARK, THE OASIS, MEADOWHALL CENTRE, SHEFFIELD

Over 200 machines including *Star Wars Trilogy*, *Silent Scope* and *Time Crisis II Deluxe*. They even had *Tekken Tag* on test recently. There's also four lanes of bowling, and the Thrill Seekers simulator with a *Wipeout XL* programme.

### ALTON TOWERS

The biggest theme park in the country is home to a large number of video games, but when there's so many huge rides around why spend all the day in an arcade when you can throw up your lunch instead?

## NOT FORGETTING...

We may have picked more Namco owned arcades than others, but we think they're the way forward as they're safe places to go with a friendly atmosphere. If you are going to the coast, then you should always be able to find an arcade that is home to some new releases. Aside from the ones mentioned, there are plenty of other great locations which should have an arcade within easy reach, such as Margate, Hastings, Weymouth, Rhyl, Skegness, Scarborough and Teignmouth. If you stumble across an arcade destination you think we've missed, write in and let us know.

**ARCADE**

**NAMCO, LONG ROW, NOTTINGHAM**

A small arcade but with pool tables and games like *Time Crisis II* it's quite up to date.

**ARCADE**

**PLEASURE BEACH, GT. YARMOUTH**

Home to a vintage wooden rollercoaster, log flume and other attractions. Great Yarmouth also has a number of other attractions which only ever appear at seaside resorts, such as the Arnold Palmer putting course, a model village and a house of wax. Cool arcades though.

**ARCADE**

**NEW YORK, NEW YORK, SOUTHEND**

A number of arcades along the seafront will grab your attention in this popular spot, but New York, New York is probably the best and is home to the latest Sega releases.

**ARCADE**

**NAMCO STATION, GALAXY CENTRE, BRIDGE ST, LUTON**

Not just an arcade, but also a bowling alley with 16 full-size lanes, pool tables and a licensed bar.

**ARCADE**

<p><b>CASINO, GOODGE ST, LONDON</b></p> <p>Right next door to Goodge Street tube, and always first with the new releases. You'll often find unfinished games on test here, and the latest fighters from Capcom.</p>	<p><b>FUNLAND, TROCADERO, PICCADILLY CIRCUS</b></p> <p>Huge arcade with bowling, dodgems and hundreds of machines. Darkly lit which can attract the wrong sort of crowd for a family party, and there's always someone whacking the punching machine outside.</p>	<p><b>SEGA WORLD, TROCADERO, PICCADILLY CIRCUS</b></p> <p>Directly above Funland, taking up a mammoth six floors, this is the largest arcade in the country with over 300 machines. And not just Sega. Themed areas house different games, but avoid the on-site rides like <i>Aqua Zone</i> and <i>Ghost House</i>. They're crap.</p>
---	---	--

<p><b>NAMCO STATION, COUNTY HALL, WESTMINSTER BRIDGE RD, LONDON</b></p> <p>Over 200 machines, placed over three floors, this is a huge arcade with the latest games, plus 12 bowling lanes, dodgems and a licensed bar if you want to play games under the influence.</p>	<p><b>NAMCO WONDERPARK, GREAT WINDMILL ST, LONDON</b></p> <p>Great arcade for the latest games, with over 180 packed into the arcade and separate zones for fighting and driving games. Well worth a look.</p>  
---	--

**ARCADE**

<p><b>PALACE PIER, BRIGHTON</b></p> <p>Historical landmark and home to two large arcades. If you get bored there's lots of stalls where you could get your fortune read and even a funfair at the far end of the pier.</p>	<p><b>FAMILY LEISURE, WEST STREET, BRIGHTON</b></p> <p>A medium size arcade that is always good for the latest games. It's currently home to <i>Dancing Stage</i>, <i>Beatmania</i> and <i>Crazy Taxi</i> amongst others. Check these cool new games out on the previous pages for more details on what they're about.</p>	<p><b>BOWLPLEX, BRIGHTON MARINA, BRIGHTON</b></p> <p>The Bowlplex has a huge bowling alley with a restaurant and bar. It's also home to the latest Sega machines, among them <i>Star Wars Trilogy</i>, <i>Daytona 2</i> and <i>Zombie Revenge</i>. Not a bad place to spend a day if you're in Brighton.</p>	<p><b>THE PIER, PROMENADE, EASTBOURNE</b></p> <p>If you're around in the evening, marvel at the pier illuminations, worth £2.5 million. If you're here in the summer, there's also a birdman contest, where crazy people jump off the end of the pier and attempt to fly.</p>

# SCOOP!

## DON'T BAN OUR GAME

This is the message game players are screaming as

**VIDEO GAMES** that have violent content and use lightguns are under fire from pressure groups who would love to see them banned. They claim, because of their violent nature, these games encourage people to duplicate violent behaviour in real life. A load of rubbish? Well, it's certainly got Sega scared.

When Dreamcast's big shooting game *House of the Dead 2* goes on sale in America, Sega won't be selling its planned lightgun to go with it. If they did, they would face pressure from protest groups asking for the game to be removed from the shelves. Sega could then be taken to trial as though it were a criminal organisation.

Americans who want to play the game with a gun, which they probably will because it's more fun, will have to go and buy an independent manufacturer's lightgun. America's concern stems

from recent murders at the hands of game playing school kids.

### GUN-SLINGING PSYCHOS

Although these kids played video games, it doesn't seem to matter that there were many other factors that lead up to those tragic events. At Computer and Video Games we know games don't turn normal people into gun-slinging psychos. And if our poll is anything to go by, you agree.

Ben Noble, aged 15, said, "If you're going to be violent, you're going to be violent. I think with games it works the other way, you get rid of any anger and violence you have by playing a game."

### YOU RECKON

He knows, like any game player, that the guns aren't real and neither are the characters that you shoot in the

games. In reality you're just pointing a fun toy at a TV screen. In fact sometimes you're not even doing that, you're wiggling a thumb over a direction-pad to aim, and pressing a button to fire. Games are a source of entertainment, much like films.

A common view amongst our poll was expressed by Dale Beecham, 17. He had similar sentiments as Ben, "Some games with shooting or racing can get you excited, but won't make you violent."

However, there is an argument that getting involved with a violent game is one deadly stage further than simply watching violence on TV or at the cinema. So we asked a more specific question - if you play a gun game, does this make you want to shoot someone for real?

"No, they're just fun", said Mark, 14. Does he know anyone who thinks like that? "No." Does this sound like grounds for banning a game to you?

Outsmart your mates, that's the thrill of *Quake*

We can't wait to nail zombies in *Resident Evil 3*

## pressure mounts to ban violent games

By PAUL DAVIES &amp; ALEX HUHTALA

**ENJOY VIOLENCE**

"I enjoy violent looking games but that doesn't mean I would go out and do something like that in real life," said David Middleton, 16. It's clear Computer and Video Games readers find the possibility of having their favourite games banned totally ridiculous. Even firing a real gun is a completely different and scary experience for someone used to playing with lightguns.

**TERRIFYING BEHAVIOUR**

While on holiday in America, Tom recently paid for tuition at an American firing range. He had access to any type of gun he wanted. He said, jokingly, "When you shoot a real gun, you'll find you've learned a lot from lightguns." However, he added more seriously, "Firing a real gun is terrifying because you know you're just centimetres from death. You certainly wouldn't point a real gun at someone, not even as a joke. And you certainly wouldn't stick it down your trousers like a gangster!"

Back in the UK, most lads grow up

pointing sticks at each other, pretending they're guns. Lots of us have owned an Action Man, who comes equipped with weapons. For generations, millions of lads have grown up playing with stuff like

Deck these guys as fast as you can without getting hit

this and will continue to do so for generations to come.

Today, the guns featured in the new blockbuster Star Wars movie are the top-selling toys in the range. But these are not dangerous; they're just a bit of harmless fun to the people who buy them.

**THAT'S LIFE**

Guns are an element of life that toy manufacturers, movie makers and video games producers recognise as something that can be used in fantasy entertainment.

We think that the people running scared of violent games, specifically those that require a lightgun, should understand that there are much complex reasons why a couple of kids would want to murder their classmates, rather than playing a harmless game of *Quake*.

Look away! Look away! It's just too horrible. Nooo...

**VOTE NOW**

Your favourite games are under threat and it's only fair you should have a chance to make yourself heard. We've set up two phone lines for you to call. If you think video games directly make people violent and should be banned, call the first number. If you think that's not true, dial the second number. Your call will be automatically registered.

# WHEN WILL NINTENDO'S NEW CONSOLE ARRIVE?

By PAUL DAVIES

**ANOTHER NEW console to challenge Dreamcast and the next generation PlayStation? Of course, Nintendo could be lying its ass off.**

Nintendo's next generation console, **Project Dolphin**, is expected to be on sale worldwide in time for **Christmas 2000**. It's also expected that their new technology, which has been developed by **IBM**, will be the most impressive ever seen. If this is true, **Dolphin** could have better games, damage **PlayStation 2** sales and possibly bounce **Dreamcast** into oblivion.

### SAME OLD STORY

The problem is, that long-term Nintendo fans have heard it all before. They can remember **Project Reality** (which eventually became **Nintendo 64**) taking three years longer than expected to see the light of day. They also suffered too many long waits for big name games like *Zelda* and *F-Zero X*.

### GOOD NEWS

Just when you expect the worst, then Nintendo gets you all excited again. Since the announcement of **Project Dolphin**,

we have discovered not only is it on schedule for the end of next year, there are nine games in development already. Guaranteed that a few of these will be at Rare.

### AND THERE'S MORE

Here's something else, too. We're not permitted to release the exact figures but **Nintendo 64** is outselling **Dreamcast** in Japan, right now. Just before Christmas Nintendo was selling twice as many consoles as **Sega**. This lead was lost through January and February but since March, **Nintendo 64** has overtaken **Dreamcast** once more.

**Nintendo's** new system could, if it genuinely delivers on time, steal back its share of game fans from **PlayStation**. Although **Sony** isn't going to let this happen without a fight. Then again, **Dreamcast** could win enough fans to become King.

## DRAKAN EATS TOMB RAIDER

**IF YOU love Tomb Raider** this new PC game could blow your mind. *Drakan* is an action RPG in which you guide a cute but tough heroine, **Rynn**, through an exciting fantasy world.

The neat bit is **Rynn** teams up with a mighty dragon transforming some sections of the game into an airborne shoot 'em up and as *Drakan* has been designed especially for PC there are some cool multi-player options: fight on the ground, in the skies, or a combination of both.

*Drakan* looks amazing and the gameplay offers some cool features you won't find anywhere else, too. Look for the full review in the next issue.

Flying a dragon is one of the coolest experiences ever in a video game. It's fun and great to watch. You really feel like showing off

**Rynn's** cuter and a whole lot tougher than **Lara**. Players get a wider range of fighting options, including over 50 weapons to use

THE MOST striking visuals we've encountered in ages are in *Fear Factor*. It makes PlayStation come alive in a very different way to what you're used to.

*Fear Factor* is presented like an animated movie, though you're in control the whole time. Those who have played *Final Fantasy* on PlayStation will already be familiar with movies you can interact with. In *Fear Factor*, this complex technique is taken to a stunning new level.

You take on the role of three characters - futuristic Hong Kong cops hunting down the mafia. As they move around the city, airborne traffic buzzes around, dark skies shift moodily, and so on. The effects are staggering.

The first impressions of *Fear Factor* are great. We'll be getting more hands-on experience soon, where we will get more of an idea how cool the game plays.

The quality of the movie sections is terrific. When you take control, the transition is seamless

This is how characters look in the game - it looks like a cartoon but the whole game plays in 3D

Donkey Kong tries to look menacing with a gun that fires coconuts

Making a monkey out of this huge dude is easy when you're an ape

# DONKEY KONG NOT JUST FOR KIDS

If you look no further than the the cute characters you'll miss out on a genuinely great game

## FIRST IN-DEPTH LOOK

By **PAUL DAVIES**

**THIS CHRISTMAS** thousands of game players could miss out on one of the biggest titles in the history of N64. With its cute characters and a plot that doesn't involve slaughtering hoards of zombies, some people will assume *Donkey Kong 64* is only for kids. Those who do, will miss out on massive worlds to explore and in-depth puzzles to solve.

Those who try it will find *Donkey Kong 64* so huge and with so many characters involved, that you won't be able to play it without an Expansion

Pak. Fortunately, Nintendo are going to give you one for free, as a 4MB Expansion Pak will be essential due to the amount of detail in store. It will be included with the game, which should retail for the same price as *Zelda 64* (£59.99) when it's released.

### SO WIDE SO HIGH SO DEEP

### BIGGEST BATON RACE EVER

There are eight worlds to explore in *Donkey Kong 64*. The only way to finish them all is by tackling each one separately with five different monkeys. Don't worry, you won't be seeing the same place five times,

It's full on the brakes as Diddy avoids being toasted. The poor ape's cacking his pants while we're admiring the lovely lighting effects. Hey Diddy, get the coin while you're at it mate. Hur hur

What's this? A new commercial for PG Tips – something to do with more perforations at the expense of one hapless gorilla? There are laws against this

Chunky Kong shows the blue vermin no mercy with this boulder

It's Chunky again, this time being chased by a Kremling in a cart

The detail is sharper than ever, thanks to the 4MB Expansion Pak

Lanky Kong works out the puzzle that opens this huge door to... well, you'll have to play it to find out

though, since each monkey is dropped into the world at a different place. But only by solving individual problems as you work your way through the game, can you move the whole team to their ultimate goal. Although what this is exactly, is being kept a secret for the moment.

**NEW TO THE CREW**

Though it isn't possible to have monkeys work directly with each other in *Donkey Kong 64*, giving piggy backs as in *Diddy's Kong Quest*, the apes still solve problems between them.

There are three new faces which make up a team of five, with Donkey and Diddy still in the running. Each has a special skill: Tiny has pigtails that enable her to fly. Lanky has long arms that allow him to punch from a distance, and reach up high. Finally there's Chunky, the strong-arm in the party. Between them they have 109 special moves, so there's a lot to keep you busy learning.

**ROOTIN TOOTIN AND FRUITIN**

In addition to their standard special moves the Kongs get monkey-style weapons to mess around with. Donkey Kong has a double-barrel coconut gun, which is pretty funny. Better than that - you've got to see it to believe it - is Chunky's pineapple launcher. Also look out for a peanut pistol and fruit grenades. All are total madness.

**THE TOP BANANA**

While the apes are busy searching for ways out of trouble, there are over 30 bonus games to play. Try the Scalextric racer if you want something crazy. More straightforward is the Kremling Bashing game, firing melons at bad guys as they stick their heads out of wooden barrels.

Donkey Kong thumps the ground sending shock waves at the enemy. Multi-coloured ones too

The Kremlings get wise to the gun-toting habits of our ape buddies. But Diddy's going to blast this barrel apart whatever

Tiny Kong lets loose a Fruit Grenade. Whatever it was, it isn't any more. For sure

**We Reckon**

You can't help being sceptical about this type of game, since they look so similar at first. *Donkey Kong 64* has enough depth and excitement to guarantee it will top the Christmas sales chart. Make sure you're not one those who ignores it.

What's the difference between Lara and Formula One cars? F1 cars have no hooters

**LAST MONTH** Lara Croft got a boost by signing up with energy drink Lucozade. Now she and her company Eidos have a high-speed act going on with Formula One team, West McLaren.

Unfortunately we won't be seeing Lara behind the wheel of a McLaren, what you will find is Eidos' logo stitched to the sleeves of Mika Hakkinen and David Coulthard as they blast round at over

200mph, in the remaining rounds of this year's F1 Championship.

The *Tomb Raider* series of games have been some of the most successful ever and with *Tomb Raider 4* coming, there seems very little to slow Lara's success. McLaren shares this reputation having won ten Drivers' Championships and 117 Grand Prix in 16 years.

**JET FORCE Gemini**, the N64's first decent fast-paced action game, is jam-packed with explosions, stuff flying all over and enemies trying to escape the blitz.

You take control of the Jet Force Gemini team, three intergalactic superheroes who

Lupus the android dog does his funky thing, and goes flying for a time. Looks very impressive

have specific mission objectives that combine to clear the game. You can go it alone, or work with a friend. There are also loads of news ideas, balanced with familiar challenges, which add up to a really fresh feel. Just like any game from the Nintendo and Rare stable, it offers loads of fun extras besides.

## WORLDS OF SPLENDOUR

There are a whopping 120 areas to challenge you in *Jet Force Gemini*, spread across gob-smacking worlds. There are huge views with minute attention to detail. Best example seen was a rocket fired from a pathway, into a distant city. The rocket's flare highlighted everything it passed by.

## SHOOT 'EM DOWN

You get to blast enemies while on the run, or carefully position shots for more precise targeting. Usually the action is viewed over the shoulder like most 3D action games but for aiming at specific targets the view moves close in, and your character turns transparent. A crosshair allows you to place accurate shots.

Movie-style cut scenes are used to build tension. Don't like the look of this bug? Well, kill it. Do it now. You know you want to

Space Invaders are all the same

## We Reckon

Pure adrenaline pumping action, peppered with cool bonuses like racing games and corridor deathmatches. *Jet Force Gemini* will impress, regardless of your age just so long as you're prepared to look beyond the typically cute Nintendo characters.

You'll be joining over 1000 other players online, waging war against them or forming alliances to conquer the vivid world of Norrath.

### IT'S ALMOST TOO EASY

To play a part in *Everquest*, to enter the world of Norrath, you must first create a character. You can choose from 12 races, and 14 classes. The races include the likes of ogres, halflings, and elves. Class refers to whether you want to be a magician, a warrior, or cleric and so on. You can be male or female and choose a face you like best. It really is a doddle.

### YOU'RE IN OUR WORLD NOW

Though you'd prefer to go after big money and look cool while slaying major-league enemies, you begin earning coppers for killing rats and pesky snakes.

Thing is, you know that guys running around you are already slaying dragons for rich rewards. What keeps you playing past 2am is the sooner you can reach their level of skill, the better. Then the game really starts to shape up.

Bear in mind characters may look like beautiful girls, but are actually fat bearded guys wearing chequered shirts

Some sexy warrior chick gets wicked with a troll. Just like what happens near us on a Friday night

### SPEAK NORRATH MATE?

One of the game's strongest features is being able to chat with other players to learn more about Norrath. There are many ways to talk, from secretive chats to public auctions. Do this and you can ask for all sorts, including directions around Norrath. Never forget, these people could be on the far side of the real world.

Unlike most games, gigantic buildings like this castle can be explored inside and out. They're heaving with people too

Magic surrounds the players who battle to the death, treading on the corpses of the not so lucky

## We Reckon

*Everquest* won't appeal to everyone as it requires persistence to get the most out of it. If it is for you, our advice is wait a month or so as the only versions of on sale are US imports and the only servers are based overseas, which aren't so reliable. Hold out until it really takes off in the UK.

# ON A MISSION

## PlayStation lands big film licence

**FACTS**

GAME: **MISSION IMPOSSIBLE**  
 FORMAT: **PLAYSTATION**  
 OUT: **OCTOBER**  
 PLAYERS: **1**  
 TYPE: **ADVENTURE**  
 BY: **INFOGRAMS**  
 STATUS: **65% COMPLETE**

major changes to the style and gameplay, but are some new additions. For a start, all of the soundtrack is streamed from the CD, so everything will sound a lot better. A new control and inventory interface has been added along with some additional speech, plus PocketStation support.

### SAME BUT DIFFERENT

The biggest problem the original had is the levels were boring to play and the game seemed like a poor man's version of *Goldeneye*. Now that the programmers have had the chance to rework it, hopefully everything will have been straightened out and the potential of the *Mission Impossible* licence released.

As the burning fuse shows, film references are numerous

The programmers are doing their best to recreate not just the film's environment but also a true to life experience

By **STEVE KEY**

**NEWS OF** the first big film licence to make it to PlayStation this month is *Mission Impossible*.

### NEW ADDITIONS

You must take control of Ethan Hunt and take on one of five missions set over 20 levels. The game doesn't appear to have many

**We Reckon**

The licence is a good one, so cross your fingers and hope the game matches it. There are still a few months to go to find out if *Mission Impossible* will be as successful as the Nintendo version.

# THE NAME'S BOND, GAMES BOND

**FANS OF** James Bond will soon have the chance to play their hero with the release of the PlayStation game *Tomorrow Never Dies*, set to coincide with the 19th Bond movie, *The World Is Not Enough*.

Early shots and info reveal the game has three major sections, with all the classic Bond ingredients that make the films so popular: gadgets, women and tons of action compressed into one package.

### BY FOOT, ROAD OR SKI

The bulk of the gameplay takes place in a third-person perspective behind Bond, although there are also driving and skiing sections. As well as the man himself you will also be able to play as Wai Lin, a Chinese agent working on the same case who has her own skills and abilities.

Major scenes are included

### SHAKEN, NOT STIRRED

There will be 14 single-player missions in the final game, set in locations fans of the film will instantly recognise, plus some plot twists and backdrops that weren't in the movie to add that something extra. There will be a multiplayer game too, just so PlayStation owners can get a taste of what they were missing with Nintendo 64's *Goldeneye*. Set for an October release, we'll have full details very soon.

**We Reckon**

After the success of *Goldeneye*, *Tomorrow Never Dies* has a lot to live up to. PlayStation owners will be expecting a game that rivals or betters Nintendo's efforts, and that could be very tough going.

You've got to be crazy hanging around in a cross-fire like this. Of course, this shot is purely so you can appreciate the detail on all the characters in a four-player deathmatch.

Unlike Joanna, this guy knows next to nothing about stealth. Easy pickings. While you're there laughing at him, you'll have time to appreciate the ultra-realistic lighting in the game.

# BOND GETS A

Joanna Dark is a kick-ass hero, but you'll need to use stealth to keep her alive.

NINTENDO'S much-loved James Bond game, *Goldeneye 007* is set to take a back seat when Rare release *Perfect Dark*.

The original game based around the Bond film has found its way into almost every Nintendo owners' collection and the new game is likely to do the same. It's reported Rare

have taken the best bits from *Goldeneye* and, as they aren't restricted by any movie licence, have been able to take it on to a new level.

### YOUR FACE IN THE GAME

Whereas *Goldeneye* followed the plot of the film closely, *Perfect Dark* doesn't have the same restrictions, opening up a whole new exciting world for you to explore. In place of 007 is a new agent, the sultry Joanna Dark who's guaranteed to put players'

*"You can place your own face*

Twin pistols in effect. No wonder there's nobody around to offer a challenge here.

"Hey you, turn around with your hands on your head." Even locations as simple as this alley contain detail that is unheard of in Goldeneye. Now, more importantly, treat yourself to an easy kill

The spooky lighting helps transform what could be an otherwise run-of-the-mill scene into a moment of suspense. You can almost taste the atmosphere

# BEATING

*Perfect Dark* looks so good you'll soon forget you ever played *Goldeneye*

favourite Lara in the shade. Better still, multiplayer mode in *Perfect Dark* has a unique twist. You can place your own face onto one of the characters.

Use a Game Boy Camera to capture your face, then slap it into the game. You can even adjust the shape of the face and pick which body it goes on.

## NEW AND IMPROVED

At the heart of *Perfect Dark* is a completely new game engine. This means locations will have more

atmosphere and depth than *Goldeneye* and thanks to a technique called Acoustic Shadowing, the lighting affects are more natural. Also, your enemy's more intelligent so you won't get the same reaction twice.

## WEAPONS LIKE YOU WON'T BELIEVE

A futuristic setting for the game means that weapons are fantastic. Star of the show is a specialist weapon called Far Sight. This gives

Joanna x-ray vision, allowing her to scan for lurking enemies. Once they're spotted, you can drop them with one lethal pulse of energy.

## GREY ISN'T DULL

You may have seen early shots of *Perfect Dark* featuring Greys, the now classic aliens. At one stage Joanna helps the Greys out of trouble. In return the Greys team up with Joanna to help solve the ultimate mystery.

You can instruct four Greys to work

with Joanna as a team. They provide cover or move on ahead to take out potential threats. They can be used in other ways too, but Nintendo are keeping these a secret for now.

## ULTIMATE DEATHMATCH

The multiplayer games are awesome. Far Sight means anyone hiding, taking cheap shots will be see straight away. You can also enlist the help of a Grey, meaning there can be up to eight players in the arena at once.

## WE RECKON

What we've talked about here is the tip of the iceberg. When *Perfect Dark* hits the stores lots of NG4s will go to new homes. It's a guaranteed hit, for sure.

The world's biggest phenomenon in games is set to sweep the UK

By PAUL DAVIES

HAVING ALREADY consumed Japan and the US, so far accounting for 15 million copies of the game sold, *Pokémon* is due to be released in the UK in August. The perfect game for Game Boy, it's a fun adventure for one, or an outstanding trade and battle game for two players.

While the cute characters will attract younger players, the concept is cool enough for anyone to enjoy: catch 150 different types of Pokémon (aka Pocket Monsters) as you travel to the land to become champion of the Pokémon League.

We describe *Pokémon* as a mixture of *Zelda* and *Magic The Gathering*-style 'Collectible Card Games'. The quest part of the game involves meeting people and performing tasks for them. When two Pokémon fight, which accounts for over half the time playing, *Pokémon* takes on a menu-driven style of play. You also need to trade Pokémon, if you want to 'Catch 'em All'.

Before you know it, we guarantee you'll be surrounded by Poké-maniacs. Sure the cartoon series (*Sky One*) is tough to stomach if you're older than eight, but we stand by the game. It's great. *Computer and Video Games* will help you become a top *Pokémon* trainer. Check back with us next month for more exclusive details.

# HOT SERVING FROM THE SOUTH PARK CHEF

By PAUL DAVIES

IF YOU'VE got the stomach for another South Park game, here's one with a different flavour. The *Chef's Luv Shack* quiz game is your chance to prove you know everything there is to know about South Park. A good thing for some.

Naturally, you'll be required to answer a bunch of South Park related questions. However, the stakes are raised by a number of mini games, with titles like *Spank the Monkey*, and *Asses in Space*.

Needless to say, *Chef's Luv Shack* is recommended for [im] mature audiences only. Look out for it this autumn.

# VROOM FOR ONE MORE

By PAUL DAVIES

**ALTHOUGH** *Formula One '98* failed on PlayStation, there are fresh hopes for *F1'99*, due to arrive in the shops in November.

The first improvement in *F1'99* is the artificial intelligence of other drivers. Advances have been made so these guys will even be able to race at the all-new Malaysian circuit in Sepang. It's fair to say that *F1'99* seems fine-tuned to take the lead.

Cars look more convincing, and handle more realistically than any of the F1 games

Use your time in the pits wisely if you want to maintain the lead

Revise your driving skills using the replay option. Or sit there, brain dead, saying: 'phwoar, luvly graphics innit' And you'd be right too

## OLD SKOOL OF HARD KNOCKS

Buying Dreamcast? Start saving for this game now

By PAUL DAVIES

**YOU GET** to choose from three characters of varying strength and speed, all armed with blades. Basic attacks can be extended with combination moves, and there's magic to target many enemies at once in case of emergency.

It's a classic concept yet the wide choice of routes through the game should extend its appeal. *Soul Fighter* is to be released close to the UK launch of Dreamcast. A PC version is also underway, and there's even talk of it on PlayStation 2. We'll have more information for you next issue.

There are some neat touches, such as spinning windmill rotors

## STAR WARS SECRET GAME REVEALED

FIRST EVER DETAILS

By PAUL DAVIES

**SHOCK NEWS** for Star Wars fans of the best possible kind, there's another *Episode One* game in addition to *Racer* and *Phantom Menace*.

It's called *Obi-Wan*, planned to be a Dark Forces-style adventure using the *Quake 3* engine (Scoop! Issue 215). News and confirmed details are really sparse at the moment, beyond knowing the game exists. No screenshots have been seen, and are unlikely to until *Phantom Menace* has been on sale for a while. We predict *Obi-Wan* will become the definitive *Episode One* game when it's released. Unfortunately this won't be until next year.

## Rumours

Too hot not to print

- The new *Track and Field* is already underway for PlayStation, with at least three new events: springboard, weight lifting, and canoeing.
- Look out for the intro to *Metal Gear: Integral*. It has been created using PlayStation 2. It was then digitised as Full Motion Video.
- 80's sci-fi schlock *Battlestar Galactica* could be reborn as a space trading and battle game later this year through Fox Interactive.
- Dreamcast has been reduced to 19,800 yen in Japan (approximately £100). But don't expect this to make a difference to the UK price.
- The flagship game for Dreamcast in Japan, *Shen Mu*, has been delayed again. This time until October. It was originally due in August.
- *Final Fantasy IX* will be released on PlayStation, not PlayStation 2. It's expected to go on sale Spring 2000 in Japan.
- *Tomb Raider IV* will feature Lara as a little girl, similar to *Legend of Zelda* on N64. Watch out for the sexy new girl who will be sharing the spotlight.
- On 6th June thousands of UK Internet Users stayed offline to protest against metered calls. MPs are discussing the issues involved.
- It looks less likely that Digital TV will lead the internet revolution. Last month BSB and Ondigital couldn't give their set-top boxes away.
- The arcade business in Japan is suffering, with over 100 Game Centres closing nationwide. Scary news for arcade operators worldwide.
- An improved version of PocketStation, the personal digital assistant/memory PlayStation card, is being developed for Western release.
- A new Turok, *Rage Wars*, is currently in development for N64. The main focus is on the deathmatches and the return of a Training Mode.
- It's unlikely that Nintendo or Sony will meet the Xmas 2000 deadline for their new systems. The production lines just don't exist.

# FOLLOW THE BEAR

Huggy Bear stars in the new TV advert for *Driver* By STEVE KEY

**STARSKY** and Hutch's man with the word on the street hits your TV screens once more time, as Antonio Fagas (AKA Huggy Bear) stars in the new *Driver* advert.

**HOW COOL?**

The ad is set in an underground car park in the 70's, opening with Huggy strolling over suspiciously to a black Ford Mustang where he chats to the driver. You then get a close up of the gearstick which has the four PlayStation symbols on it. Finally, the ad shifts to some cool game footage where you see a huge car chase and cars jumping over bridges.

**TIME TO RELAX**

Check the ad out for yourself on Channel 4 and 5, as well as Sky Sports and Sky One.

Unfortunately, you won't see Huggy getting deeply involved in his copy of CVG because a) it doesn't look like that any more and b) it's not in the ad. Oh well

# DIE HARD IS BACK IN TOWN

John McClane returns in another all action, blow-up-everything-you-see adventure

**AFTER** the phenomenal success of the original game, the white vest returns for a new title. The game's set in Las Vegas with the token criminals attempting to wipe the city out. Guess who happens to be in town?

**THREE GAMES IN ONE**

The old motto 'if it ain't broke, don't fix it' comes into play here as the games offers the three styles of gameplay that made the original so popular. You can play them in two styles, too. The movie mode links

together the third-person *Tomb Raider* style gameplay with the driving and light gun sections. Or you can play arcade mode and flick between the three at will.

**VIVA LAS VEGAS!**

Vegas is recreated properly, so the neon casinos and hotels along the strip and surrounding desert are all here. Also, because the game has three different styles of play, you'll be able to use all manner of wheels, analogue pads and light guns to make the experience even more realistic.

**WE RECKON**

With no film to release the game on the back of, we don't know how well it will sell. If it plays like the original, *Die Hard Trilogy 2* should be a big hit.

**FIRST LOOK**

## NEW SCREENSHOTS

By **STEVE KEY**

**ELECTRONIC Arts**, the company behind the massive-selling *FIFA* series, is to march on stronger than ever with two new titles due out in the coming months.

First will be *FA Premier League Stars*. As it's been developed in Britain, the game will have all the passion, energy and pure adrenalin that comes with the Premier League. In the game you'll get all of the official stadiums, kits, sponsors and player names.

## STARS IN THEIR EYES

The way this game differs from previous *FIFA* outings is after every

game you're awarded stars. Man of the match, goals, clean sheets – can all give you stars. You can use the stars to bump up the attributes of your players, or use them as money for transferring them. All this can be saved onto a memory card and taken round to a mate's, so your custom Southampton can take on the mighty Everton.

## FIFA 2000

THIS is the very first pic of *FIFA 2000* you'll see anywhere. The major difference is the season now runs in a complete form, so the cups are intertwined with the league to make a season. There are up-to-date rosters for 15 leagues from around the world, as well as national teams too. Season mode means you can be relegated or promoted, plus qualify for Europe. Animations have been improved, and you now get mid-air collisions, shoulder charges and players jostling for possession.

## WE RECKON

*Premier League* will be huge, coinciding with the new football season and *FIFA 2000* is bound to continue EA's domination. You, or someone you know, will be playing them soon.

You can zoom in on specific battles like this, or watch the whole fleet fight

*Insurrection* is a third-person game and is set after the events of the film

This is *Hazard Team* at a very early stage. All you can see are the game levels

# RETURN OF THE ENTERPRISE

Captain's log, stardate E3 1999. Trekkies get a trio of new PC titles to drool over By **STEVE KEY**

THERE ARE to be three new *Star Trek* titles released, to satisfy the demands from the wide variety of game players the cult series and movies have attracted. *Star Trek: Voyager - Hazard Team* is a first-person shooter, *Star Trek Armada* is a real-time strategy game featuring the team from the *Next Generation* series. Finally, there is *Star Trek Insurrection*, a game based on the film released in 1998. You even get to do the Spock Nerve Pinch.

## HAZARD TEAM

The first game based on the *Voyager* licence goes for a corridor style to try and entice the punters. The early screenshots don't give much away. Although little is known, we've found out phasers and other weapons from the show are going to be there, plus most of the well known locations.

## ARMADA

More information has been released on *Armada*. It's similar to *Command*

and *Conquer* but is set in space.

You set up Federation, Romulan, Klingon and Borg fleets and fight the remaining clans for control of the universe. In your quest you must construct and command over 30 starships, space stations and repair facilities to make your empire. Don't forget to take into account the various space environments, like wormholes or asteroids.

This appears the most complete of the three new games and should, with a bit of luck, be in the shops by the end of the year.

## INSURRECTION

The game is set one year after the film of the same name, and you have control of a graduate ensign assigned to Captain Picard.

Each level takes the form of orders from the bald one, which you have to carry out to thwart any Romulan plans to cripple the Federation. One very cool thing about *Insurrection* is that one of your weapons is the Vulcan Nerve pinch, so you can 'do a Spock' on enemies. Totally knock-out and dead cool.

## WE RECKON

*Hazard Team* has potential to follow on from *Klingon: Honour Guard* to be the premier *Star Trek* first person game. On paper, at least, the other two look as though they could be decent games.

The trails are different colours to identify the teams. It makes it easier for you to target the rival team as you speed along

GAME: **WIPEOUT 3**

 STATUS: **90% COMPLETE**

**THE GAME** that defined PlayStation cool is back. Pretty soon we'll have a *Wipeout* trilogy on our hands. With the last one improving dramatically on the original, this is where the series could really take off.

We're looking to *Wipeout 3* to show the way forward for PlayStation, the same as the original did in 1995. With a number of exciting developments, things are certainly hotting up.

For the first time on PlayStation you'll be able to fly the futuristic craft using your Dual Shock pad. This means you'll glide smoothly around the circuits using analogue control and feel the effects of weapons used against you. Everything will look sharper too, with the entire game in PlayStation's high-resolution mode.

We're guaranteed everything and more than the previous games. You can decide if the extras will make this game concept worthy a third time.

## EVERYONE CAN BE A HERO

We doubt there are many people who have yet to experience a *Wipeout*

game. But for the benefit of everyone – including the pros – the new game features a more scientific learning curve. It's tougher at the top but everyone is eased in more gently.

## MY OTHER CAR'S A GOTEKI

Three new ships, in addition to the original five in *Wipeout 2097*, are yours to master. These don't just look different, they handle in extreme ways too.

In the previous games there are subtle differences, mainly to do with top speed and torque. But the new ships are much taller now, or narrower, creating a new feel altogether. It's now much more about balance as you blast along the high-speed racetracks.

## BOOM FARF FIZZLE PRANG

Eliminating your opponents is a key aspect of *Wipeout* – especially if you want to beat the tougher leagues. There are now seven new weapons to toy around with, plus five of the best imported from *Wipeout 2097*. Unfortunately you'll have to wait

another month before we can reveal what these new weapons are. Not our fault, by the way, everything's being kept a secret, you see.

## FRICTION BETWEEN FRIENDS

One way to see if your PlayStation is as hot as you hoped is the new *Wipeout* two-player option. You can compete against a friend, splitting the screen vertically or horizontally, in a straightforward Challenge race or in a serious Death Match. It's a shame this game isn't going to appear on PC – eight-player races would be absolutely awesome.

## STYLE AT THE SPEED OF SOUND

Credibility with the style crowd is essential to the *Wipeout* experience. The previous games had soundtracks that include music by Prodigy and the Chemical Brothers. This time we find

Sasha's name down for Musical Director, overseeing around ten new licensed tracks. You'll notice that The Designers Republic has designed new logos and art for the project. This is *Wipeout* alright.

These new ships are almost cigar-shaped. Expect them to be superb along straights, but tricky on corners

## We Reckon

Looks like we could have the ultimate *Wipeout* experience on our hands. With the original buzz, plus extras to ensure extended play, we're hopeful this will round off the trilogy very nicely indeed.

You can see for miles ahead and pick out roadside detail, thanks to the clarity of the new graphics engine. Looks awesome, don't you think?

# ROCKET FUELLED RACER
